

THEORISING GENDER*

R. W. CONNELL

Abstract A social theory of gender is implied and required by current sexual politics. Its scope cannot be defined *a priori*, but can be defined practically by the reach of a network of arguments generated by feminism, gay liberation, psychoanalysis and some branches of academic sociology and psychology. Two main types of theory have emerged: one emphasising attitudes and social expectations, centring on the idea of 'sex roles'; the other presupposing the categories of 'women' and 'men' and focussing on power relations between them. Criticisms of both general approaches to gender relations are outlined. An argument is advanced for a modification of the second, centring on the practices that constitute gender categories. Some examples of this third approach are mentioned. The problem of 'natural difference' can be handled in a practice-based theory of gender by a radical reversal of usual assumptions about biological 'bases' of gender, stressing negation and practical transcendence. Some political implications of this approach to theory are raised.

Introduction

We are in the middle of the most important change in the social sciences, and Western social thought generally, since the impact of socialist class analysis in the mid-nineteenth century. Questions of sexuality and personality formation were made prominent by psychoanalysis from early in this century, but Freudian doctrines have always been reputed speculative outside a narrow therapeutic context. A sociology of the family and a psychology of sex differences and sex roles have stuttered along for decades as academic specialties of a rather marginal kind. Academic anthropology has given much more attention to kinship, but its interest has tended to create an impression that this is a matter of importance only in 'primitive' societies. That is the view held by contemporary theorists as prominent as Jürgen Habermas; in his reformulation of historical materialism, sex appears as a 'principle of organisation' of pre-class societies only (Habermas, 1979).

That view has to be regarded as obsolete, in the strict sense of the word. 'Second wave' feminism and gay liberation have now made inescapable what was already suggested by some theorists of the 1940s. Sexuality, child development, the family, 'sex role' conventions, and kinship are parts of a whole. That whole is a social structure, not a biological one. It is, among other things, a structure of power, inequality and oppression; a structure of great scope, complexity, and consequence in our affairs as well as those of tribal and ancient societies.

In these respects it is fully comparable with the structure of class relations that has been the main concern of social analysis since the 'army of redressers' (Thompson, 1968) marched onto the scene and made questions of class inescapable a hundred and fifty years ago. The redressers of sexual oppression are currently producing a critical and analytical literature of an intellectual liveliness and practical relevance unmatched in any other field of social science.

Theorizing Gender An Introduction

Kathleen Lennon, Rachel Alsop

Theorizing Gender An Introduction:

Theorizing Gender Rachel Alsop, Annette Fitzsimons, Kathleen Lennon, 2002-06-03 This accessible text aims to give a theoretical overview of approaches to gender. The book discusses the major theories concerned with the ways in which we become engendered and explains and evaluates naturalist, psychoanalytic, materialist and post-structuralist accounts. Tensions between these different approaches are acknowledged but stark polarities are resisted. Throughout the book it is recognized that becoming gendered implicates and is implicated by other aspects of social becoming. The work of Judith Butler is discussed in detail and its importance and limitations spelt out in key chapters on sexuality, the body, transgenering and political agency. Debates between queer approaches to gender and those prioritizing sexual difference are also brought to the fore. *Theorizing Gender* aims to provide a framework for weaving together what are often viewed as opposing directions of thought. Students and researchers in sociology, philosophy and gender studies and all those with an interest in gender will find it an invaluable resource.

Theorizing Gender Rachel Alsop, 2002 [Gender Theory in Troubled Times](#) Kathleen Lennon, Rachel Alsop, 2020-01-17

Theorizing gender is more urgent and highly political than ever before. These are times in many countries of increased visibility of women in public life and high profile campaigns against sexual violence and harassment. Challenges to fixed traditional gender norms have paved the way for the recognition of gay marriage and gender recognition acts allowing people to change the gender assigned to them at birth. Yet these are also times of religious and political backlash by the alt right, the demonization of the very term gender and a renewed embrace of the naturalness of gendered difference as ordained by God or Science. A follow up to the authors 2002 text *Theorizing Gender* this timely and necessary intervention revisits gender theory for contemporary times. Refusing a singular truth about gender, the authors explore the multiple strands which go into making our gendered identities in the context of materialist and intersectional perspectives interwoven with phenomenological and performative ones. The resulting critical overview will be a welcome and invaluable guide for students and scholars of gender across the social sciences and humanities.

Beyond The Woman's Card. The Politics of Gender in Hillary Clinton's Second Presidential Campaign Catherina Kaiser, 2018-12-13 Bachelor Thesis from the year 2016 in the subject Gender Studies grade 1.0 LMU Munich Amerika Institut language English abstract The USA remains one of very few powerful democratic nations that are yet to elect a female head of state. This BA thesis aims to deconstruct the idea of the modern USA as a post gender society and show that gender in reality still matters in society just as in presidential politics. Kaiser's analysis first of all aims to illustrate the different layers the famous glass ceiling is made of in American society in general and in presidential politics in specific. Furthermore it displays how these invisible barriers have affected Hillary Rodham Clinton as an individual woman on her rise to power. And finally it proposes to analyze Clinton's changing strategies from 2008 to 2016 to deal with gender as a variable in her efforts to become president.

How Do Such Social Factors as Gender, Racial/ethnic Backgrounds and Social Class Relate to Juvenile Delinquency in Trinidad and Tobago? Stacy Ramdhan, 2011-07 Research Paper postgraduate from the year 2011 in the subject Sociology Law Delinquency Abnormal Behavior grade A The University of the West Indies St Augustine language English abstract The increase in criminal and deviant behaviour among youths juveniles in Trinidad and Tobago has been a national concern for some time. Reports on serious crime murder attack with weapons rape larceny kidnapping allegedly committed by youths and is reported in the media. This upsurge has given rise to what are the causal factors for the extent and forms of delinquency. The dynamics of gender race and social class will be examined to demonstrate how they are related to the upsurge in delinquency and criminal activities in this youth section of the population.
