Language Learning by a Chimpanzee The Lana Project brings together several disciplinary endeavors such as primatology experimental psychology cognitive psychology computer and information sciences and neurosciences This book is composed of two sets of data one relates to language learning in the chimpanzee while the other deals with language construction by Homo sapiens The fundamental issue of mind brain dualism and difference between man and beast are also covered This text mainly describes the LANA project that aims to develop a computer based language training system for investigation into the possibility that chimpanzees may have the capacity to acquire human type language This publication is recommended for biologists specialists and researchers conducting work on language learning in nonhuman primates *The New York Drama: no. 1-12* ,1876 **Colin Gunton, Tim Keller, and the Trinitarian Challenge to Individualism** Steve Pearson,2025-08-05

In today's market driven world the relationship between faith and work is vital for every Christian in the workforce This book examines how much Christian thinking on the subject needs a radical shift Traditionally the focus has been on how Christians can influence the marketplace often

overlooking the profound ways the market shapes our theology With a fresh perspective the book centers on identity contrasting today s individualism with the relational model of the Trinity It argues that the market can erode our Christian identity and distort our theology often without us being aware Through the insights of British theologian Colin Gunton who explored the Trinity s connection to identity and the work of Timothy Keller on faith and work the book reveals a crucial truth our understanding of identity is not relational enough To truly engage meaningfully at the intersection of faith and work our foundational theology must be reframed *The New York Drama* ,1876 **Vagueness, Logic and Ontology** Dominic Hyde,2016-02-17 The topic of vagueness re emerged in the twentieth century from relative obscurity It deals with the phenomenon in natural language that manifests itself in apparent semantic indeterminacy the indeterminacy for example that arises when asked to draw the line between the tall and non tall or the drunk and the sober An associated paradox emphasises the challenging nature of the phenomenon presenting one of the most resilient paradoxes of logic The apparent threat posed for orthodox theories of the semantics and logic of natural language has become the focus of intense philosophical scrutiny amongst philosophers and non philosophers alike Vagueness Logic and Ontology explores various responses to the philosophical problems generated by vagueness and its associated paradox the sorites paradox Hyde argues that the theoretical space in which vagueness is sometimes ontologically grounded and modelled by a truth functional logic affords a coherent response to the problems posed by vagueness Showing how the concept of vagueness can be applied to the world Hyde s ontological account proposes a substantial revision of orthodox semantics metaphysics and logic This book will be of particular interest to readers in philosophy linguistics cognitive science and geographic information systems

Cement and Engineering News ,1907 *The Southern Reporter* ,1918 Includes the decisions of the Supreme Courts of Alabama Florida Louisiana and Mississippi the Appellate Courts of Alabama and Sept 1928 Jan 1929 Jan Mar 1941 the Courts of Appeal of Louisiana Fitting Things Together Alex Worsnip,2021 Some combinations of attitudes beliefs credences intentions preferences hopes fears and so on do not fit together right they are incoherent A natural idea is that

there are requirements of structural rationality that forbid us from being in these incoherent states Yet many philosophers have recently attempted to minimize or eliminate structural rationality arguing that it is just a shadow of substantive rationality that is correctly responding to one's reasons In *Fitting Things Together* Alex Worsnip pushes back against this trend providing the first sustained defense of the view that structural rationality is a genuine autonomous unified and normatively significant phenomenon **Harper's Young People**, 1881
