Haigh, 1903 **The Higher Powers of Man** Frederick Madison Smith, 1918 **The Palgrave Handbook of Queer and Trans Feminisms in Contemporary Performance** Tiina Rosenberg, Sandra D'Urso, Anna Renée Winget, 2021-09-21 The purpose of this Handbook is to provide students with an overview of key developments in queer and trans feminist theories and their significance to the field of contemporary performance studies It presents new insights highlighting the ways in which rigid or punishing notions of gender sexuality and race continue to flourish in systems of knowledge faith and power which are relevant to a new generation of queer and trans feminist performers today The guiding question for the Handbook is How do queer and trans feminist theories enhance our understanding of developments in feminist performance today and will this discussion give rise to new ways of theorizing contemporary performance As such the volume will survey a new generation of performers and theorists as well as senior scholars who engage and redefine the limits of performance The chapters will demonstrate how intersectional queer and trans feminist theoretical tools support new analyses of performance with a global focus The primary audience will be students of theatre performance studies as well as queer gender studies The

volume's contents suggest close links between the formation of queer feminist identities alongside recent key political developments with transnational resonances. Furthermore, the emergence of new queer and trans feminist epistemologies prompts a reorientation regarding performance and identities in a 21st century context.

Emerging Technologies to Enhance Learning among Slow Learners Dr. R. Gnanadevan and Dr. R. Babu, 2019-04-08 Information technology IT has become a vital and integral part of every business plan. Technology has the ability to enhance relationships between teachers and students. When teachers effectively integrate technology into subject areas, teachers grow into roles of adviser, content expert, and coach. Technology helps make teaching and learning more meaningful and fun. From multi-national corporations who maintain mainframe systems and databases to small businesses that own a single computer, IT plays a role. The reasons for the omnipresent use of computer technology in business can best be determined by looking at how it is being used across the business world.

Happy U Olga Kabel, 2019-05-07 From an evolutionary standpoint, our brains are wired to be suspicious and expect the worst. This served us well in terms of the survival of the species, but it doesn't work so well if you are trying to minimize the amount of stress and worry in your life. Luckily, within our same brains, we have neurocircuitry dedicated to the feelings of peace, contentment, and joy. This journal relies on recent developments in neuroscience and traditional yogic ideas to enhance each area of your life, whether it's your health, your work, your relationships, or your experiences of joy and contentment. Contrary to popular belief, yoga is not just about stretching or strengthening your body; it is actually about directing your energy and clarifying your mind. It also works really well for breaking the inertia of the daily grind and for helping you reassess who you are, where you are in your life, and where you want to be. Another fundamental idea in yoga is that joy is the essence of who we are, but our unruly thoughts, emotions, perceptions, and reactions often obscure this joy. It is up to us to sort through the clutter and reclaim our inner joy. This journal contains 25 simple activities you can do to unearth your inner joy. They include simple tasks, reflections, and occasional yoga practices to counterbalance the brain's negative bias and make a more positive outlook the new normal. Some activities are only a few minutes long; others will involve simply looking at your hurdles in a new light, and others will be full-length yoga practices you get to pick what fits into your life right now. These small steps have the potential to shift how your brain responds to obstacles and rewire it to experience the world from a calmer and happier place.
