The Open Classroom Reader:

The Open Classroom Reader Charles E. Silberman, 1973 Reading Lessons Gerald Coles, 1999-09 The dominant debate over literacy disregards the myriad societal influences that affect teaching and learning influences that are not readily visible in the classroom No debate can adequately understand how literacy is taught and learned what causes literacy achievement and underachievement or how literacy success is defined unless it accounts for these macro influences If the debate over literacy were more about politics economics and power in society and less about the best way to teach literacy we would better understand how to rear literate children Intro p 8 **Pioneers of Early Childhood Education** Barbara

Peltzman, 1998-01-26 Early childhood education is fundamental to a child's later educational achievements and future success The principles and practices of modern early childhood education have their origins in the past While the educators who built the field have been the subject of many detailed studies previous works do not provide adequate coverage of primary and secondary sources multicultural educators or more recent leaders in the discipline This reference book provides biographies and annotated bibliographies of more than 30 pioneers in early childhood education from Johann Amos Comenius 1592 1670 and John Locke 1632 1704 to Maria Montessori 1870 1952 Leland B Jacobs 1907 1992 and Lillian Weber 1917 1994 Special attention is given to multicultural educators including Mary Church Terrell 1863 1954 and her work with The National Association of Colored Women Biographies are arranged alphabetically and each is followed by annotated bibliographies of primary and secondary sources An introductory essay briefly discusses the history of early childhood education from the 17th century to the present The following biographies are arranged alphabetically and each includes a brief summary of the subject's contributions to the field of early childhood education Each biographical sketch is followed by annotated bibliography of primary and secondary sources including obituaries articles dissertations and books Works were selected because they represent the most interesting and informative sources by and about the educators The volume closes with a chronological listing of the pioneers and a selected bibliography of general works on early childhood education

Psychological Effects of Open Classroom Teaching on Primary School Children Robert A. Horwitz, 1976 **Achievement in One Open Classroom** Judith M. Plummer, 1977 Nurturing Creativity in the Classroom Ronald A. Beghetto, James C. Kaufman, 2016-11-07 As interest in creativity explodes it has become more complicated to decide how to best nurture creativity in our schools There are the controversial Common Core Standards in many states Meanwhile the classroom has become increasingly digital it is easier to access information communicate ideas and learn from people across the world Many countries now include cultivating creativity as a national educational policy recommendation yet there is still debate over best practices Indeed many well intentioned educators may institute programs that may not reach the desired outcome The notion that schools kill creativity has become a widespread social meme We view such beliefs as both hyperbolic and problematic they allow us to recognize there is a problem but not solve it In this book a wide array of international experts

addresses these issues discussing theories and research that focus on how to nurture creativity in K 12 and college level classrooms

Enlightened Literacy Beyond the Reading Wars Dr. Deborah Duncan Owens, 2025-05-29 *Enlightened Literacy Beyond the Reading Wars* Providing Hope for Democracy Global Citizenship and the Human Condition provides an in depth historical analysis of the reading wars that have dominated the policy discussions and governmental mandates about how reading is taught in public schools across the United States for decades The resulting fixation on phonics and criticism of public schools continues to drive headlines in spite of what is considered settled science about the essentiality of phonics in early reading instruction Deborah Duncan Owens journey to develop a new paradigm for literacy instruction through enlightened literacy provides insight into the convergence of the economic and governmental forces that have resulted in the stagnation of literacy research and practice and the reductionist view of reading instruction that threatens literacy development in the United States Enlightened Literacy offers an alternative framework that holds the promise of moving beyond the reading wars toward a more expansive vision for literacy education Actualizing enlightened literacy in the classroom environment is examined through four aspects 1 a panoramic perspective 2 a humanistic ethos 3 a spirit of curiosity and 4 a focus on the pragmatic
