J. Ramos,2019-04-30 Progressive intellectual Henry A J Ramos believes the United States is at

a crossroads facing the most challenging moment since the civil rights movement of the late 1960s and early 1970s In fact absent major new interventions and investments he sees this moment as a pivotal turning point in the American journey in which political polarization income and wealth disparity and public violence much of which is race related threaten the very essence and integrity of our democracy and economy Ramos examines the policies that have contributed to America s decline including those that have led to the concentration of great wealth in the hands of a few while condemning many to systemic poverty and inequality Current economic and social trends he stresses are unsustainable and call for organized concerted action by people of conscience and those affected Ultimately Ramos provides a roadmap for the future so the United States can continue to provide opportunities for its people and serve again as a leader in the international community He offers case studies of organizations that have successfully created and administered programs that further equity in society restore democratic practices implement better urban and city planning and protect the environment Demonstrating both the critical importance and real possibility of leveraging prosperity and justice for all Americans this compelling work is a must read for anyone interested in democracy economic restoration and environmental sustainability Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-03-27 In the United States some populations suffer from far greater disparities in health than others Those disparities are caused not only by fundamental differences in health status across segments of the population but also because of inequities in factors that impact health status so called determinants of health Only part of an individual s health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives When these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways Communities in Action Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States This report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome **Annual Report ...** Canada.
