Architectural Colour in the Professional Palette Fiona McLachlan, 2013-08-15 How do architects use color Do they adopt a different strategy or starting point for every project Do they gradually cultivate individual color palettes which develop alongside their body of built work Do they utilize or are they aware of the body of theoretical work that underpins the use of color in the past and forms the basis of most of the color systems commercially available today Informed by the author's thirty years in architectural practice and academia this book investigates documents and analyzes the work of a number of contemporary architects in order to respond to these questions and provide a clear reference of contemporary color use The book suggests a holistic approach to the integration of color in architecture through a series of thematic essays the text explores and reveals underlying principles in color design and application Case studies include AHMM Caruso St John Erich Wiesner and Otto Steidle Gigon Guyer O'Donnell Tuomey Sauerbruch Hutton Steven Holl UN Studio The book provides clear insights into how particular contemporary architects use color confidently and intelligently as an integral part of their design philosophy in conjunction with their choices of materials and finishes Offering a stimulating view of the history of color theory and pragmatic advice to practicing architects this book will be inspiring to both design professionals and students

Light: The Shape of Space Lou Michel, 1995-10-27 *Light The Shape of Space* Designing with Space and Light Lou Michel Every design professional who touches a space shapes the light and the feeling of that space Architect lighting engineer interior designer lighting or home furnishing manufacturer each contributes an aesthetic layer sometimes yielding unexpected results All too often the best laid plans of one professional are unintentionally subverted by another Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created *Light The Shape of Space* showing how to design with the effects of light rather than light itself The book is a revolutionary resource for all

design professionals and manufacturers of surfacing materials Drawing on over fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as *Light The Shape of Space* **Painting and Decorating** ,1889
