order to achieve acceptable performance on relatively slow hardware Early programmers were sparing in their use of high level language code knowing that a high level language compiler would generate crummy low level machine code for their software Today however many programmers write in high level languages like Python C C C Java Swift The result is often sloppy inefficient code But you don t need to give up the productivity and portability of high level languages in order to produce more efficient software In this second volume of the Write Great Code series you ll learn How to analyze the output of a compiler to verify that your code does indeed generate good machine code The types of machine code statements that compilers typically generate for common control structures so you can choose the best statements when writing HLL code Just enough 80x86 and PowerPC assembly language to read compiler output How compilers convert various constant and variable objects into machine data and how to use these objects to write faster and shorter programs NEW TO THIS EDITION COVERAGE OF Programming languages like Swift and Java Code generation on modern 64 bit CPUs ARM processors on mobile phones and tablets Stack based architectures like the Java Virtual Machine Modern language systems like the Microsoft Common Language Runtime With an understanding of how compilers work you ll be able to write source code that they can translate into elegant machine code That understanding starts right here with Write Great Code Volume 2 Thinking Low Level Writing High Level The Call to Write John Trimbur,2002-10 Adapted from the highly successful rhetoric The Call to Write this Concise Edition is organized by the genres of writing and is grounded in the reality of students lives The Call to Write gives students the practice they need to write both in college and in the public sphere This text connects writing to the real worlds of everyday life college and work giving students reasons to write and the skills to help them succeed A strong emphasis on public writing promotes civic involvement through writing to inform the public to shape opinion to advocate change etc while relevant provocative readings underscore when and why citizens are called to write
