The Expanded Life:

The Hidden History of Earth Expansion Stephen W. Hurrell, 2020-05-14 For more than half a century the theory of continental drift was widely derided. Innovators developing the radical theory were labelled as unscientific by well known science authorities. But then in the space of a few years virtually all opposition dramatically collapsed. Continental drift transformed into plate tectonics and became widely acknowledged as one of the most profound scientific revolutions of the twentieth century. Yet a number of science innovators who had been closely involved with creating this new theory of the Earth continued to research an even more radical theory. They saw evidence that the new geological theory was incomplete, arguing that continental drift was caused by the Earth expanding in size. These science innovators give us a unique insight into their experiences. They relate their personal histories of Earth expansion in 14 original essays. **The Hidden History of Earth Expansion** presents the unique personal histories of British, American, Australian, German, Polish, Romanian, Indian, Albanian, and Jamaican science innovators as they strived to produce a modern theory of the Earth. It includes chapters expressly written for the book by some of the most well known researchers into Earth expansion: Hugh G. Owen, Cliff Ollier, Karl Heinz Jacob, James Maxlow, Jan Koziar, Stefan Cwojdzinski, Carl Strutinski, Stephen W. Hurrell, John B. Eichler, William C. Erickson, David Noel Zahid, A. Khan, Ram Chandra Tewari, Vedat Shehu, and Richard Guy. In addition to furnishing us with their personal histories of Earth expansion and the seemingly overwhelming evidence for its confirmation, the authors highlight areas where further research is required.

The Handbook of Mental Health and Space Laura McGrath, Paula Reavey, 2018-09-19 The **Handbook of Mental Health and Space** brings together the psychosocial work on experiences of space and mental distress, making explicit the links between theoretical work and clinical and community practice. The change from an institutional to community care model of mental health services can be seen as a fundamental spatial change in the lives of service users, and the book aims to stimulate discussion about mental healthcare spaces and their design. With contributions from those involved in theorizing space, those drawing on their own experiences of distress and space, as well as practitioners working on the ground, the book will be of interest to mental health practitioners and academics.
