The Predicament:

The Improbability of Othello Joel B. Altman, 2024-05-31 Shakespeare's dramatis personae exist in a world of supposition struggling to connect knowledge that cannot be had judgments that must be made and actions that need to be taken For them probability what they and others might be persuaded to believe governs human affairs not certainty Yet negotiating the space of probability is fraught with difficulty Here Joel B Altman explores the problematics of probability and the psychology of persuasion in Renaissance rhetoric and Shakespeare's theater Focusing on the Tragedy of Othello Altman investigates Shakespeare's representation of the self as a specific realization of tensions pervading the rhetorical culture in which he was educated and practiced his craft In Altman's account Shakespeare also restrains and energizes his audiences probabilizing capacities alternately playing the skeptical critic and dramaturgic trickster A monumental work of scholarship by one of America's most respected scholars of Renaissance literature *The Improbability of Othello* contributes fresh ideas to our understanding of Shakespeare's conception of the self his shaping of audience response and the relationship of actors to his texts

Critique of Political Decolonization Bernard Forjwuor, 2023-05-24 What is political independence As a political act what was it sanctioned to accomplish Is formal colonialism over or a condition in the present albeit mutated and evolved In *Critique of Political Decolonization* Bernard Forjwuor challenges what in normative scholarship has become a persistent conflation of two different concepts political decolonization and political independence This scholarly volume is an antinormative and critical refutation of the decolonial accomplishment of political independence or self determination in Ghana He argues that political independence is insufficiently a decolonial claim because it is framed within the context of a country where a permanent colonial settlement was never deemed necessary for the consolidation of future colonial political obligations So while territorial dissolution was politically engineered by Ghanaians the colonial merely reconstitutes itself in different legal and ideological forms Forjwuor offers new methodological theoretical and conceptual approaches to engaging the questions of colonialism political independence political decolonization justice and freedom and constructs multiple conceptual bridges between traditional disciplinary fields of inquiry including politics history law African studies economic history critical theory and philosophy and political theory Using the Ghanaian experience as a rich case study Forjwuor rethinks what colonialism and decolonization mean and asserts that decolonization is primarily a question of justice

One Child John Apley, Christopher Ounsted, 1982-04-22 The Cartesian split of human creatures into psyche and soma has had a profoundly bad influence on the medical care of children In fact the concept of psychosomatic disease as a separate entirely false one there being no illness that does not in some way affect behaviour and

no behaviour which is not in some way mediated by physiological factors However the subtleties of our understanding of child illness have gone much further than simply unmasking this false dichotomy This book will now unveil the parts played by other features of the broader environment the family stress socioeconomic factors and other predicaments including that of loving and being loved To understand the child within these wider terms the professionals involved in helping the child and the parents must in some way be given a new perspective a broader view One Child provides this perspective stepping outside conventional presentations into the more exciting possibilities of reassessing the influences and roles of the disease itself and the environment in which it arises This represents challenge and will inevitably cause controversy which should itself push the perspectives further

The Social, Cultural, and Political Discourses of Autism Jessica Nina Lester,Michelle O'Reilly,2021-11-13 Taking up a social constructionist position this book illustrates the social and cultural construction of autism as made visible in everyday educational institutional and historical discourses alongside a careful consideration of the bodily and material realities of embodied differences The authors highlight the economic consequences of a disabling culture and explore how autism fits within broader arguments related to normality abnormality and stigma To do this they provide a theoretically and historically grounded discussion of autism one designed to layer and complicate the discussions that surround autism and disability in schools health clinics and society writ large In addition they locate this discussion across two contexts the US and the UK and draw upon empirical examples to illustrate the key points Located at the intersection of critical disability studies and discourse studies the book offers a critical reframing of autism and childhood mental health disorders more generally

Discursive Framings of Human Rights Karen-Margrethe Simonsen,Jonas Ross Kjaergard,2016-10-14 What does it mean to be a subject of human rights The status of the subject is closely connected with the form and rhetoric of the framing discourse and this book investigates the relationship between the status of the subject and the form of human rights discourse in differing aesthetic and social contexts Historical as well as contemporary declarations of rights have stressed both the protective and political aspects of human rights But in concrete situations and conflictual moments the high moral legitimacy of human rights rhetoric has often clouded the actual character of specific interventions and so made it difficult to differentiate between the objects of humanitarian intervention and the subjects of politics Critically re examining this opposition between victims and agents of human rights through a focus on the ways in which discourses of rights are formed and circulated within and between political societies this book elicits the fluidity of their relationship and with it the shifting relation between human rights and humanitarianism Analysing the symbolic framings of testimonies disaster stories atrocity tales political speeches and philosophical arguments it thus establishes a relationship between these different genres and the political economic and legal dimensions of human rights discourse
