**Logical Modalities from Aristotle to Carnap** Max Cresswell, Edwin Mares, Adriane Rini, 2016-09-15 Interest in the metaphysics and logic of possible worlds goes back at least as far as Aristotle but few books address the history of these important concepts This volume offers new essays on the theories about the logical modalities necessity and possibility held by leading philosophers from Aristotle in ancient Greece to Rudolf Carnap in the twentieth century The story begins with an illuminating discussion of Aristotle's views on the connection between logic and metaphysics continues through the Stoic and mediaeval including Arabic traditions and then moves to the early modern period with particular attention to Locke and Leibniz The views of Kant Peirce C I Lewis and Carnap complete the volume Many of the essays illuminate the connection between the historical figures studied and recent or current work in the philosophy of modality The result is a rich and wide ranging picture of the history of the logical modalities

*Wildlife Resources* Harald H. Roth, Günter Merz, 2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underpricing of natural resources and the overemphasis on economic development coupled with unimpeded rapid population growth and the preponderance of materialistic consumption oriented attitudes The management and use of

natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their social function and the indirect economic benefits which can be derived from them has developed Thus as regards these traditional resources multi use concepts comprising eco nomically oriented utilisation as well as recreational educational and social use have be come widely accepted Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining eco nomic development all over the world Fortunately the industrialised countries have started to apply this principle themselves and in their technical and financial aid to the developing Third World countries This is manifest from policy documents such as the World Bank Policy on Development of Wild Lands issued in 1987
