Beyond the Classroom Walls Bertram C. Bruce, 2022-08-09 The book asks readers to adopt a critical and comprehensive view of education pre K to lifelong learning as existing both within classroom walls and in the surrounding world including communities and workplaces It presents an integrated view of online learning community schools communiversities and learning through work Our educational systems are organized in ways that make this integration difficult We have elaborate systems of formal instruction academies schools universities and training institutes all to facilitate learning within the walls At the same time we have ample opportunities for learning in the wild Unfortunately these systems diverge to the point that they do little to support learning that allows us to draw from both of the realms of knowledge But it is possible to bring together learning within the walls with that beyond the

walls Moreover it is crucial to make these connections in the world of today In order to bring together the classroom and daily life we need an educational system that does that as well The book provides a coherent account of how schooling can and should relate to learning beyond the classroom walls *Digital Legend and Belief* Andrew Peck,2023-07-18 The internet brings new urgency to the study of folklore The digital networks we use every day amplify the capacity of legends to spread swiftly define threats and inform action Using the case of a particularly popular digital bogeyman known as the Slender Man Andrew Peck brings the study of legends into the twenty first century Peck explains not only how legends circulate in the digital swirl of the internet but also how the internet affects how legends seep into our offline lives and into the mass media we consume What happens he asks when legends go online How does the internet enable the creation of new legends How do these ideas go viral How do tradition and technology interact to construct collaborative beliefs Peck argues that the story of the Slender Man is really a story about the changing nature of belief in the age of the internet Widely adopted digital technologies from smartphones to social media offer vast potential for extending traditional and expressive social behaviors in new ways As such understanding the online landscape of contemporary folklore is crucial for grasping the formation and circulation of belief in the digital age Ultimately Peck argues that advancing our comprehension of legends online can help us better understand how similar belief genres like fake news conspiracy theories hoaxes rumors meme culture and anti expert movements are enabled by digital media *Georgette Heyer, History and Historical Fiction* Samantha J. Rayner, Kim Wilkins,2021-02-25 The Nonesuch is the name of one of Georgette Heyer s most famous novels It means a person or thing without equal and Georgette Heyer is certainly that Her historical works inspire a fiercely loyal international readership and are championed by literary figures such as A S Byatt and Stephen Fry Georgette Heyer History and Historical Fiction brings together an eclectic range of chapters from scholars all over the world to explore the contexts of Heyer s career Divided into four parts gender genre sources and circulation and reception the volume draws on scholarship on Heyer and her contemporaries to show how her work sits in a chain of influence and why it remains pertinent to current conversations on books and publishing in the twenty first century Heyer s impact on science fiction is accounted for as are the milieu she was writing in the many subsequent works that owe Heyer s writing a debt and new methods for analysing these enduring books From the gothic to data science there is something for everyone in this volume a celebration of Heyer s nonesuch status amongst historical novelists proving that she and her contemporary women writers deserve to be read and studied as more than just guilty pleasures *Mobility, Data and Learner Agency in Networked Learning* Nina Bonderup Dohn, Petar Jandrić, Thomas Ryberg, Maarten de Laat,2020-03-26 The chapters in this book are based on selected peer reviewed research papers presented at the 11th biennial Networked Learning Conference NLC 2018 held in Zagreb and were chosen as exemplars of cutting edge research on networked learning The chapters are organized into three main sections 1 Aspects of mobility for Networked Learning in a global world 2 Use and misuse of algorithms and learning analytics 3 Understanding

and empowering learners The three main sections are flanked by chapters which introduce and reflect on Networked Learning as epistemic practice The concluding chapter draws out perspectives from the chapters and discusses emerging issues The book focuses on the nature of learning and interactions as an important characteristic sought out by researchers and practitioners in this field
