Software Process Definition and Management Jürgen Münch,Ove Armbrust,Martin Kowalczyk,Martín Soto,2012-05-27 The concept of processes is at the heart of software and systems engineering Software process models integrate software engineering methods and techniques and are the basis for managing large scale software and IT projects High product quality routinely results from high process quality Software process management deals with getting and maintaining control over processes and their evolution Becoming acquainted with existing software process models is not enough though It is important to understand how to select define manage deploy evaluate and systematically evolve software process models so that they suitably address the problems applications and environments to which they are applied Providing basic knowledge for these important tasks is the main goal of this textbook M nch and his co authors aim at providing knowledge that enables readers to develop useful process models that are suitable for their own purposes They start with the basic concepts Subsequently existing representative process models are introduced followed by a description of how to create individual models and the necessary means for doing so i e notations and tools Lastly different possible usage scenarios for process management are highlighted e g process improvement and software process simulation Their book is aimed at students and researchers working on software project management software quality assurance and software measurement and at practitioners who are interested in process definition and management for developing maintaining and operating software intensive systems and services

Critical Factors in Software Process Improvement Umar Farooq,2014-10-29 Seminar paper from the year 2014 in the subject Computer Science Software grade A course Software Process Improvement language English abstract The complexity of the software systems is increasing as the time is passing by the software systems are becoming more complex to be managed The Software process improvement will help in optimizing the software and minimizing the complexity of the software products So one have to take into account the software improvement factors which affect the process and go for the best solution and the best result can be achieved The Software process improvement has also proved that it will increase the quality of the product and services without considering the size of the organization Besides improving the quality products and projects it will also improve the returns

on the investment **Software Process Improvement** Reidar Conradi, Tore Dybå, Dag I.K. Sjøberg, Tor Ulsund, 2010-10-14 For over a decade software process improvement SPI has been promoted as an approach to improve systematically the way software is developed and managed. Mostly this research and the relevant experience reports have focused on large software companies. This book collects the main results from four Norwegian industrial research and development projects on SPI carried out between 1996 and 2005. It concentrates on small and medium sized companies typically characterized by fast changing environments.

The papers constitute the research proceedings of the 15th EuroSPI European Software Process Improvement conference in Dublin, Ireland, 3-5 September 2008. Since the first conference held in Dublin in 1994, EuroSPI conferences have been held in 1995 in Vienna, Austria; in 1997 in Budapest, Hungary; in 1998 in Gothenburg, Sweden; in 1999 in Pori, Finland; in 2000 in Copenhagen, Denmark; in 2001 in Limerick, Ireland; in 2002 in Nuremberg, Germany; in 2003 in Graz, Austria; in 2004 in Trondheim, Norway; in 2005 in Budapest, Hungary; in 2006 in Joensuu, Finland; and in 2007 in Potsdam, Germany. EuroSPI has established an experience library, www.eurospi.net, which will be continuously extended over the next few years and was made available to all attendees. EuroSPI has also started an umbrella initiative for establishing a European Certification Network in which different SPINs and national ventures can join mutually beneficial collaborations. EQN, EU Leonardo da Vinci network project. With a general assembly on 15-16-10-2007 through EuroSPI partners and now works in collaboration with the European Union supported by the EU Leonardo da Vinci Programme, a European certification association has been created, www.certificates.org for the IT and services sector to offer SPI knowledge and certificates to industry, establishing close knowledge transfer links between research and industry.

Software Process Improvement Robin B. Hunter, Richard H. Thayer, 2001-12-11 The text is a collection of original and republished papers providing a significant survey on the use of SPI and software process assessment SPA as practiced by companies such as Lockheed Martin Siemens and Hewlett Packard Among the important features of the book are chapters on software process evaluation how to best perform SPI ISO 9000 and TickIT an alternative approach to SPA as well as the latest information on the CMM integration project The text also provides vivid descriptions on the most important international and national standards for SPI in particular ISO 9001 ISO 9000 3 ISO **Process Improvement in Quality Management Systems** Walter R. McCollum, 2004 Foreword After more than two decades since the advent of Total Quality Management one might think there was nothing left to say regarding its application but Walter Ray McCollum shows that one would be wrong **Process Improvement in Quality Management Systems Case Study of Carnegie Mellon s Capability Maturity Model CMM** explores how a company can obtain Level 3 compliance where an organization s processes for management and engineering activities are formally defined documented and integrated into a standard process that is understood and followed by the organization s staff in the development and maintenance of software Once an organization has reached this level it has a foundation for continuing progress New processes and tools can be added with minimal disruption and new staff members can be easily trained to adapt to the organization s practices Numerous case studies have been enacted across industries to describe successful and unsuccessful implementation of quality management systems and programs Several generic frameworks for quality management implementation have been proposed to help organizations achieve quality productivity and gain a competitive edge However few attempts have been made to synthesize frameworks for measuring quality management practices especially with regard to managing software quality Phan 2001 found the best known work concerned with process improvement was the Software Engineering Institute Capability Maturity Model CMM However very few studies have examined the effects of process improvement on quality management systems and no studies have addressed the variables that impact the effective use of SW CMM McCollum mitigates these gaps to offer software

development professionals and developers of quality management systems the information they need to enhance their effective use of SW CMM This book empowers projects teams and organizations by giving them the foundation to support reasoned choice and identify findings relative to the effects of process improvement in quality management systems using SW CMM process focus and risk management training Marilyn K Simon Ph D President Math Power *The Human Being as Key Element for Software Process Improvement* Alfons Unmüßig, 2012-10-17 Scientific Essay from the year 2012 in the subject Computer Science General language English abstract This paper aims to explain a new approach of software process improvements SPI The approach will not replace the existing methods but will support them for SPI from an additional view The additional view consists the SPI as a networked system of the activities for SPI The approach is an extract of a comprehensive PhD paper about SPI and defect prevention from the author In the PhD paper the author is using over 100 important influence elements The title of the PhD paper is Ganzheitlich vernetzte Fehlerprvention im Software Entwicklungsprozess Unmüßig 2012 Today there are various actions and constructive methods in software process improvements used As there are a lot of different elements and subjects in the process of improvements involved it is a complex process The most involved elements and subjects are e.g. the human being management members of staff customer work psychology methods organisations culture etc The author's own experience and studies confirm that the human being is one of the most important elements in the process The human being is much more involved in the process than considered in the daily work today His work performance e.g. software process improvements depends on a lot of interlinked factors This paper will use an excerpt of 12 important elements of the above mentioned PhD paper The elements will be interlinked A software tool is used to interlink present and simulate the interrelationship to the other elements The approach and results can be used in all software process improvements SPI software development processes to support the existing SPI approaches and measures The support is based on the position strengths and relationship of the elements in the result matrix

Costs and Benefits of Software Process Improvement Karen D. Prenger, Naval Postgraduate School (U.S.), 1997-12-01 There are numerous problems in DoD software development projects The ad hoc practices used in the military services and in industry have resulted in unpredictable costs and schedules and low quality products This thesis proposes that one solution to these problems is to integrate Software Process Improvement SPI activities based on a proven model into software development projects Both a formal and an informal approach to SPI will be discussed The thesis will also describe not only the problems encountered in most software development projects but also the activities defined in these SPI approaches that are designed to solve these problems A case study of a military project that has spent several years implementing SPI activities based on Software Engineering Institute's SEI Capability Maturity Model CMM is presented The SPI activities were implemented in an effort to deliver a high quality product with high reliability while maintaining a high level of control of costs and schedule This project has succeeded in its goals and the costs and benefits of

the project's efforts will be presented *Making Process Improvement Work* Neil S. Potter, Mary E. Sakry, 2002 Every development organization can benefit by paying attention to process improvement yet all too many process improvement initiatives fail to deliver on their promises In this concise book two of the field's leading consultants present easy to apply techniques for achieving rapid and quantifiable benefits and then maintaining your momentum to deliver even greater value over time Drawing on their experience with more than 3 000 developers and 100 organizations Neil S Potter and Mary E Sakry show you exactly what works and what doesn't work Next they present a step by step guide to identifying your best opportunities for process improvement deploying changes effectively and tracking your progress The book also includes a detailed example plan document designed to help you jumpstart your process improvement initiative *Making Process Improvement Work* includes a foreword by noted software process expert Karl Wieggers For all developers project and IT managers and clients seeking to maximize the effectiveness of the software development process and the value of the software it delivers
