Ayia Irini David E. Wilson, Mary Eliot, Whitney Powell-Cummer, 2024-10-15 Continuing the work of publishing the the excavations at the site of Ayia Irini on the Cycladic island of Keos this volume focuses on the architecture and stratigraphy of the site

Collision and Collapse at the Africa-Arabia-Eurasia Subduction Zone \ Douwe J. J. van Hinsbergen, Michael A. Edwards, Rob Govers, 2009 The Mediterranean and northern Arabian regions provide a unique natural laboratory to constrain geodynamics associated with arc continent and continent-continent collision and subsequent orogenic collapse by analysing regional and temporal distributions of the various elements in the geological archive This book combines thirteen new contributions that highlight timing and distribution of the Cretaceous to Recent evolution of the Calabrian-Carpathian-Aegean and Anatolian segments of the Africa-Arabia-Eurasia subduction zone These are subdivided into five papers documenting the timing and kinematics of Cretaceous arc-continent collision and Eocene and Miocene continent-continent collision in Anatolia with westward extrusion of Anatolia as a result Eight papers provide an overview and new data from stratigraphy, structure, metamorphism and magmatism covering the geological consequences of the largely Neogene collapse that characterizes the segments of interest in response to late stage reorganization of the subduction zone and the roll back and break off of segments of the subducting slab

Early Cycladic Sculpture in Context Marisa Marthari, Colin Renfrew, Michael J. Boyd, 2017-01-04 The sculpture of the early bronze age Cyclades has been systematically studied since the time of Christos Tsountas at the end of the 19th century But that study has been hampered by the circumstance that so many of the subsequent finds come from unauthorized excavations where the archaeological context was irretrievably lost Largely for that reason there are still many problems surrounding the chronology, the function and the meaning of Early Cycladic sculpture This lavishly illustrated and comprehensive reassessment sets out to rectify that situation by publishing finds which have been recovered in controlled excavations in recent years as well as earlier finds for which better documentation can now be provided Using the material from recent excavation projects and drawing on the papers presented at a symposium held in Athens in 2014 it is possible now to undertake a fresh overview of the entire body of sculpture from the Cycladic islands which has been found in secure archaeological contexts Beginning with early examples from Neolithic settlement sites and extending into a consideration of material found in later contexts the 35 chapters are divided into sections which examine sculpture from settlements, cemeteries and the sanctuary at Kavos concluding with a discussion of material techniques and aspects of manufacture
