Onizuka who had already been the first Asian American astronaut in space But the highlight of the mission was to be the NASA Teacher in Space Project in which a

civilian teacher would give teaching lessons to his or her class while onboard the space shuttle The winner of the competition was Christa McAuliffe a high school teacher in Concord New Hampshire who wrote a winning essay and had to undergo a year of astronaut training before that fateful day It was a beautiful morning and many spectators came to the Kennedy Space Center to watch the launch including McAuliffe s parents and her students Several news networks were carrying live broadcasts of the launch including live shots of McAuliffe s parents as they watched the Challenger liftoff Mission Control s transmissions to the Challenger were being blared over loudspeakers to give spectators a play by play of the shuttle s ascent Ascent seemed to be going normally during the first minute but about 75 seconds into the ascent a plastic O ring used to seal a joint in one of the solid rocket boosters failed causing a breach of hot gas That gas spread to the other rocket booster and the external fuel tank causing an explosion When the spectators saw the explosion many of them started cheering unaware of what was really happening But Mission Control quickly announced that there had been some sort of problem and the crowd became confused and then panicky as the space shuttle fuel tank and rocket boosters all broke apart and flew in opposite directions Some cameras fixed on the falling debris as it fell to the ocean while others stayed focused on McAuliffe s parents The entire crew was killed in the explosion and investigations concluded that they may have survived until crashing into the ocean After the Challenger disaster the space shuttles were grounded for about two years and a commission issued findings that would be used in an effort to prevent similar tragedies The Space Shuttle Challenger Disaster The History and Legacy of NASA s Most Notorious Tragedy chronicles the disaster from the origins of its mission to what went so terribly wrong Along with pictures of important people places and events you will learn about the Challenger like never before
