Spotlight Sparrows is packed with eye-catching informative colour photos and features succinct detailed text written by a knowledgeable naturalist Sparrows are often considered familiar to the point of invisibility but the recent steep decline in numbers of both native British species is a reminder that these unassuming chatterboxes deserve a little more attention Of all the true sparrow species found worldwide only two occur in the British Isles Globally the story of the House Sparrow is one of dramatic expansion from humble origins in the Middle East where they spread along with agriculture to become the most widely distributed bird on the planet The smaller more active Tree Sparrow has also spread extensively following the domestication of rice rather than wheat and both species have been heavily persecuted in recent years In Spotlight Sparrows Amy Jane Beer examines the causes behind the decline of these familiar species and explores their biology and life cycle

social behaviour and the significant role that sparrows play in human culture from Shakespeare and Edith Piaf to Captain Jack Sparrow

[Biology of the Ubiquitous House Sparrow](#) Ted R. Anderson, 2006-08-10 After the chicken the House Sparrow is the most widely distributed bird species in the world occurring on all continents except Antarctica and on most human inhabited islands Although its Latin name is *Passer domesticus* it is certainly not domesticated In fact it is widely regarded as a pest species and is consequently not protected in most of its extensive range This combination of ubiquity and minimal legal protection has contributed to its wide use in studies by avian biologists throughout the world The purpose of this book is to review and summarize the results of these global studies on House Sparrows and to provide a springboard for future studies on the species House Sparrows have been used to study natural selection in introduced species circadian rhythms and the neuroendocrine control of the avian annual cycle One current question of considerable interest concerns the catastrophic House Sparrow population declines in several urban centers in Europe Is the House Sparrow a contemporary canary in the mine Other topics of broad interest include the reproductive and flock foraging strategies of sparrows and sexual selection and the function of the male badge in the species Anderson also explores the role of the House Sparrow in disease transmission to humans and their domesticated animals
