**New Urban Housing** Hilary French, 2006-01-01 A timely investigation of the most innovative recent urban housing constructions The design of high density housing is inextricably linked to the growth of towns and cities as urban centers have increased in both geographical size and density housing has had to be provided to accommodate the numbers and needs of the population Whether highly visible or merged with the existing cityscape a vast proportion of the fabric of any city is made up of residential space New Urban Housing looks at a selection of some of the most inventive contemporary projects built in countries around the world Author Hilary French provides a comprehensive introduction to this building type from its

industrial beginnings in London and Paris to New York City's Lower East Side and the 20th century designs of Le Corbusier, Antonio Sant'Elia and Mies van der Rohe. Lavishly illustrated, the book examines different formal typologies of urban housing: terrace and row houses, quadrangles and courtyards, city blocks and infill or renovated and reused sites and towers and slab blocks. Thirty-six case studies from fourteen countries are presented by architects including Steven Holl, Richard Meier, Koenig Eizenberg Architecture, Eduardo Souto de Moura and Renzo Piano. Each is illustrated in full color and is accompanied by detailed plans and sections that discuss the needs of the site and place the project in its surrounding context. New Urban Housing features these buildings and more: Contemporaine Chicago, Donnybrook Quarter London, Harold Way Apartments Hollywood, Mondrian Apartments Sydney, Simmons Hall MIT Cambridge MA, Yerba Buena Lofts San Francisco.

**Rethinking Aesthetics** Ritu Bhatt, 2013. *Rethinking Aesthetics* is the first book to bring together prominent voices in the fields of architecture, philosophy, aesthetics and cognitive sciences to radically rethink the relationship between body and design. These essays argue that aesthetic experiences can be nurtured at any moment in everyday life thanks to recent discoveries by researchers in neuroscience, phenomenology, somatics and analytic philosophy of the mind who have made the correlations between aesthetic cognition, the human body and everyday life much clearer. The essays by Yuriko Saito, Juhani Pallasmaa and Richard Shusterman among others range from an integrated mind-body approach to chair design to Zen Buddhist notions of mindfulness to theoretical accounts of existential relationships with buildings to present a full spectrum of possible inquiries. By placing the body in the center of design, *Rethinking Aesthetics* opens new directions for rethinking the limits of both essentialism and skepticism. *Norman Foster* Norman Foster, David Jenkins, 2002. The works of Norman Foster from 1993-2004 are the focus of this book, the fifth instalment of a multi-volume retrospective. The text about each project is accompanied by colour photographs and detailed plans. **Cuttings** Joanne Jakovich, 2006. Shifting economies have left the world's post-industrial cities with isolated zones of abandonment, iconic yet dormant sites that are both physically and culturally vacant. These sites are typically dislocated, contaminated and often construed as a danger to be made safe or an economic burden to be made profitable. They exist within the urban fabric though through disuse or disconnection they exist distinct from that fabric. They are Urban Islands. The research articles and design projects in this book consider how post-industrial sites may be used as templates for new ways of energising cities with cultural activity. The Urban Islands Project on Cockatoo Island is a pointer to the possibilities. **Bizarre Buildings** Paul Cattermole, Ian Westwell, 2007. A well-illustrated survey of some of the world's most extreme and sometimes weird buildings and structures. Some are personal expressions and follies, others are innovative and iconic masterpieces by architects, all are intriguing. *Sky Scrapers* Andres Lepik, 2004. This title reveals every facet of the skyscraper as an architectural icon. *Renzo Piano Building Workshop* Renzo Piano, 2007. This monograph focuses on Piano's most remarkable buildings such as the Pompidou Centre in Paris which he co-designed with Richard Rogers and the Beyeler building in Switzerland. **TRADE Architecture Today**, 2003.

*Reinventing the Skyscraper* Ken Yeang, 2002 Underlying Yeang's projects is a programme of research that focuses on the design of the skyscraper a design that derives from the recognized importance that climate has on finding energy efficient resources

Buildings for Tomorrow Paul Cattermole, 2007 Architects have always dreamed of shaping the future of building utopian worlds filled with seemingly impossible structures that break with the past to propel mankind far into the twenty first century and beyond Buildings for Tomorrow reviews forty such visionary projects that appear to come from futures that mankind has so far only imagined Buildings for Tomorrow reviews forty such visionary projects that appear to come from futures that mankind has so far only imagined Spread across nineteen countries over thirty architects from famous names to little known innovators have combined the latest technological advances with their boundless creative energy to bring their constructions into being
