Souslin Problem Donald Reginald Traylor, 1960 **Souslin's Problem** Robert Elias Atalla, 1962 **Set Theory,**
Arithmetic, and Foundations of Mathematics Juliette Kennedy, Roman Kossak, 2011-09-01 This collection of papers from
various areas of mathematical logic showcases the remarkable breadth and richness of the field. Leading authors reveal how
contemporary technical results touch upon foundational questions about the nature of mathematics. Highlights of the volume
include a history of Tennenbaum's theorem in arithmetic, a number of papers on Tennenbaum phenomena in weak
arithmetics as well as on other aspects of arithmetics such as interpretability, the transcript of G del's previously unpublished
1972-1975 conversations with Sue Toledo along with an appreciation of the same by Curtis Franks, Hugh Woodin's paper
arguing against the generic multiverse view, Anne Troelstra's history of intuitionism through 1991, and Aki Kanamori's history
of the Souslin problem in set theory. The book provides a historical and philosophical treatment of particular theorems in
arithmetic and set theory and is ideal for researchers and graduate students in mathematical logic and philosophy of
mathematics. **Handbook of the History of General Topology** C.E. Aull, R. Lowen, 2013-04-18 This book is the first one
of a work in several volumes treating the history of the development of topology. The work contains papers which can be
classified into 4 main areas. Thus there are contributions dealing with the life and work of individual topologists, with specific
schools of topology, with research in topology in various countries, and with the development of topology in different periods.
The work is not restricted to topology in the strictest sense but also deals with applications and generalisations in a broad
sense. Thus it also treats e.g. categorical topology, interactions with functional analysis, convergence spaces, and uniform
spaces. Written by specialists in the field, it contains a wealth of information which is not available anywhere else. **Some**
Characterizations of Souslin's Problem Frances Elizabeth Blount, 1971 **Constructibility** Keith J. Devlin, 2017-03-16
Since their inception, the Perspectives in Logic and Lecture Notes in Logic series have published seminal works by leading
logicians. Many of the original books in the series have been unavailable for years but they are now in print once again. In this
volume, the sixth publication in the Perspectives in Logic series, Keith J. Devlin gives a comprehensive account of the theory of
constructible sets at an advanced level. The book provides complete coverage of the theory itself rather than the many and
diverse applications of constructibility theory, although applications are used to motivate and illustrate the theory. The book is
divided into two parts. Part I, Elementary Theory, deals with the classical definition of the L hierarchy of constructible sets and
may be used as the basis of a graduate course on constructibility theory, and Part II, Advanced Theory, deals with the J
hierarchy and the Jensen fine structure theory. **General Topology** Stephen Willard, 2012-07-12 Among the best available
reference introductions to general topology, this volume is appropriate for advanced undergraduate and beginning graduate
