Population in China Nancy E. Riley,2016-12-16 China is home to a fifth of the worlds inhabitants For the last several decades this huge population has been in flux fertility has fallen sharply mortality has declined and massive rural to urban migration is taking place The state has played a direct role in these changes seeing population control as an important part of its intention to modernize the country In this insightful new work Nancy E Riley argues that Chinas population policies and outcomes are not simply imposed by the state onto an unresponsive citizenry but have arisen from the social organization of China over the past sixty years Riley demonstrates how Chinas population and population policy are intertwined and interact with other social and economic features Riley also examines the unintended consequences of state directives including the extraordinary number of missing girls the rapid aging of the population and an

increase in inequality particularly between rural and urban residents Ultimately China's demographic story has to be understood as a complex multi pieced phenomenon This book will be essential reading for researchers and students of China and social demography as well as non specialists interested in the changing nature of China's population *Handbook of Welfare in China* B. By O.F.T. O F. T, 1866 Innovation in China Richard P. Appelbaum, Cong Cao, Xueying Han, Rachel Parker, Denis Simon, 2018-10-15 China is in the midst of transitioning from a manufacturing based economy to one driven by innovation and knowledge This up to date analysis evaluates China's state led approach to science and technology and its successes and failures In recent decades China has seen huge investments in high tech science parks a surge in home grown top ranked global companies and a significant increase in scientific publications and patents Helped by state policies and a flexible business culture the country has been able to leapfrog its way to a more globally competitive position However the authors argue that this approach might not yield the same level of progress going forward if China does not address serious institutional organizational and cultural obstacles While not impossible this task may well prove to be more difficult for the Chinese Communist Party than the challenges that China has faced in the past Balance and Limitation of Intellectual Property Protection in China Chenguo Zhang, 2022-10-31 The book focuses the openness of Chinese copyright law and patent law namely the right limitation and exception rules as the IP internal balancing mechanism and the right enforcement and protection as the IP external balancing mechanism It examines the highlights of the 3rd and 4th amendments to the Chinese copyright law patent law and the trademark law addressing the most debated questions during these amendments This book also takes a comparative approach to study the legislations and case laws in the USA EU and China The comparison covers the legislation case decisions which could offer useful clues for legislators to revise the current law for judges to decide the cases about relevant topics and lay down their market plans Moreover this study also provides several recommendations for the right holders who are currently operating or planning to operate in China regarding the de facto protection levels of their IP rights the risks of right infringement and litigation costs
