The German Jets In Combat:

The German Jets in Combat Jeffrey L. Ethell, Alfred Price, 1979 *German Jets of World War II* Dominique Breffort, Andre Jouineau, 2012-11-19 Germany was not only the first country to get a jet aircraft to fly but above all it was the only country fighting in World War Two to mass produce and above all engage several types of aircraft using this new kind of power plant in the fighting thus opening the way for air warfare as we know it nowadays This new volume in the collection Planes and Pilots which wittingly ignores the myriad of jet aircraft projects which the Germans thought up all during the war most of which never got beyond the drawing board only deals with the machines which were built in enough numbers to be used operationally The Messerschmitt Me 163 rocket fighter more dangerous for its pilots than for its opponents the twin engined Arado 234 better at reconnaissance than at bombing which was its intended role the Heinkel He 162 the People's Fighter built in record time but arriving too late to prove the effectiveness of its design and above all the Messerschmitt Me 262 the real star among the German fighters during the last year of the war and whose tally of kills gives a glimpse of the real impact on the course of the war it might have had had its development not been so considerably delayed by innumerable technical problems and for a while by crass strategic errors

The Jet Race and the Second World War S. Mike Pavelec, 2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec's analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport

The Fate of Nazi Germany's Jet Engineers Reiner Decher, 2024-11-30 In April 1945 American forces were sweeping eastwards toward Berlin in part advancing across territory that would eventually become part of the Soviet Occupation Zone As they advanced US troops uncovered major parts of the manufacturing facilities and the people associated with the engines that powered Germany's last generation of military aircraft the jet fighters and bombers

Understandably the engine technology involved in powering these aircraft such as the Messerschmitt Me 262 and the Arado Ar 234 was of great interest to the Allied nations Among the many questions that needed to be answered was whether the Germans had made important breakthroughs in their successful use of these engines Having made these discoveries and seizures the American authorities needed to decide exactly what they would do with them Would they share the bounty with the other Allies American collaboration with the British was a fact The French while Allies were in American eyes militarily unimportant in realizing the defeat of Nazi Germany Sharing technology with them was not of great interest The Soviets were far behind but nevertheless ambitious and keen to catch up to western military capability The Americans knew their relation to the Soviets was tense and confrontational no sharing was likely there From their perspective Hitler's jet engineers faced not only a lost war but the economic and intellectual realities that work in Germany would not be available They had technical knowledge and experiences that were undeniably valuable to the Allied victors These nations would be engaged in a new competition for control of world affairs that would be called the Cold War While the major technical interests were atomic bombs guided missiles and jet engines it is the last of these that is explored here What happened to the people and to the institutions they would staff This is the story of some who found homes and work in the US and in France and some who were brutally abducted to the Soviet Union This is also the story of American decisions made regarding the German jet engineers and the consequences for them as people and propulsion technology for American French and Soviet aviation The competitive stance between the Soviet Union and the Western Allies was one of the key elements of the Cold War that followed It led to a brutal Russian view and execution of war reparations that elevated the Soviet Union into a powerful position to challenge the West

[German Jets Versus the U.S. Army Air Force](#) William N. Hess, 1996 Addresses a critical period in WW II air combat through interviews with German and American pilots and analysis of reports

Luftwaffe Combat Reports Bob Carruthers, 2012-03 My Luftwaffe is invincible And so now we turn to England How long will this one last two three weeks Hermann Goering June 1940 These detailed accounts of Luftwaffe combat operations are taken from the extensive series of interviews conducted with higher echelons of the German Fighter Force by the USAAF very shortly after the end of the Second World War The new generation of German fighters such as the Me 262 was at the forefront of the agenda and the USAAF were particularly keen to learn as much as they could about these machines and their successes and failures These fascinating insights cover the experience of the Luftwaffe during the whole war and are drawn from the interviews conducted by those who managed to excel despite all that was thrown at them Heinz Bar an ace with 240 victories to his credit Walter Dahl an anti bomber specialist Hitsch Hirschhold who undertook many high risk operations with his Stukas and FW 190s and Adolf Galland last commander of the Luftwaffe and author of the classic memoir *The First and the Last* The frustrations which the pilots of the Luftwaffe encountered in their own aircraft is well voiced within these pages as is the tenuous relationship between the fighter and bomber wings of the Luftwaffe Political interference the bane of the

Wehrmacht also raised its head within the Luftwaffe and the consequences of intermeddling by Hitler and others in the Nazi machine are expressed in the interviews These absorbing primary source accounts of aerial combat at the tactical operational and strategic level provide a unique window on the Luftwaffe at war [The Oxford Companion to American Military History](#) , **Aircraft of World War II in Combat** ,2008 A comprehensive history of the use of air power during World War II From Blitzkrieg Dive Bombing Attacks To Parachute Landings And Aerial Reconnaissance [Fighting Hitler's Jets](#) Robert F. Dorr,2013-11-15 Fighting Hitler s Jets is the personal story of the American fighter pilots who defeated the German Luftwaffe in the spring and summer of 1944 only to find themselves up against Adolf Hitler s Wunderwaffen or wonder weapons *The Luftwaffe Over Germany* Donald Caldwell,Richard Muller,2014-04-02 A wonderful book on the Luftwaffe s WW2 operations German Air Force and its struggle to defend Germany from the Allied bomber attacks FSAddon The Luftwaffe over Germany tells the story of one of the longest and most intense air battles in history The daylight air struggles over Germany during World War II involved thousands of aircraft dozens of units and hundreds of aerial engagements Until now there has been no single book that covers the complete story from the highest levels of air strategy to the individual tales of Fw 190s Bf 109s and Me 262s in air combat against the American bomber streams This ground breaking work explores the detrimental effect of Luftwaffe theory and doctrine on the German air arms ability to defend the homeland once the Allied Combined Bomber Offensive began in earnest By mid 1944 they had lost the battle but had exacted a terrible price from the Americans in the process The product of a ten year collaboration between two noted Luftwaffe historians this work fills a major gap in the literature of World War II The authors have examined original war diaries logbooks doctrine manuals after action reports and interviews with many combat veterans to produce a richly detailed account Illustrated with nearly two hundred photographs as well as new maps and diagrams this is the standard work on the subject Looking for a better book on the German air defense of the Third Reich in daylight during the war would probably be a useless endeavor A Wargamers Needful Things *War-chronicle* ,1916 **Aerial Age Weekly** ,1915 *Hitler's Northern War* Adam R. A. Claasen,2001 Adolf Hitler had high hopes for his conquest of Norway which held both great symbolic and great strategic value for the Fuhrer Despite early successes however his ambitious northern campaign foundered and ultimately failed Adam Claasen for the first time reveals the full story of this neglected episode and shows how it helped doom the Third Reich to defeat Hitler and Raeder the chief of the German navy were determined to take and keep Norway By doing so they hoped to preempt Allied attempts to outflank Germany protect sea lanes for German ships access precious Scandinavian minerals for war production and provide a launchpad for Luftwaffe and naval operations against Great Britain Beyond those strategic objectives Hitler also envisioned Norway as part of a pan Nordic stronghold a centerpiece of his new world order But as Claasen shows Hitler s grand expectations were never realized Gring s Luftwaffe was the vital spearhead in the invasion of Norway which marked a number of wartime firsts Among other things it involved the first large

scale aerial operations over sea rather than land the first time operational objectives and logistical needs were fulfilled by air power and the first deployment of paratroopers Although it got off to a promising start the German effort particularly against British and arctic convoys was greatly hampered by flawed strategic thinking interservice rivalries between the Luftwaffe and navy the failure to develop a long range heavy bomber the diversion of planes and personnel to shore up the German war effort elsewhere and the northern theater s harsh climate and terrain Claasen s study covers every aspect of this ill fated campaign from the 1940 invasion until war s end and shows how it was eventually relegated to a backwater status as Germany fought to survive in an increasingly unwinnable war His compelling account sharpens our picture of the German air force and widens our understanding of the Third Reich s way of war **Aircraft Armament** Louis Bruchiss,1945

Pictorial History of the World War Willis John Abbot,1919 **The World War for Liberty** Francis Rolt-Wheeler,1919 **The Our Race News-leaflet** ,1906 **The Nations at War** Willis John Abbot,1918 **U.S. Air Services** ,1945 *King's Complete History of the World War ...* William C. King,1922
