## Walkabout K2 Science:

Developing Tomorrow's Leaders Pamela L. Eddy, Debbie L. Sydow, Richard L. Alfred, Regina L. Garza-Mitchell, 2015-07-22  
The contributions of community colleges to society are well documented Yet today s community colleges are at a cross road Decreases in funding support a push for college completion attention on developmental course work and a host of other demands create a dynamic context for community college operations Who leads these colleges matters as they face these demands and how they lead influences outcomes Pending leadership retirements provide a prime opportunity for thinking about community college leadership in new ways Entering this environment are prospective and aspiring leaders who are often not adequately prepared for the complexities of managing in a paradoxical organization The era of accountability puts a fine point on the need for leaders to pay heed to the policy making process and to requirements dictated by state legislative bodies and accreditation bodies Foundations and grant funders serve as instigators for changes in community colleges as well and also support research into ways to link employer needs to college curricular changes This book argues that neo leaders are required to lead transformational change for today and tomorrow s community colleges No longer can we rely on single leaders atop a hierarchy Talent throughout the institution must be tapped The authors argue that networked leadership is needed For networked leadership we begin to advance thinking about the role of networks and connections among leaders throughout the college and beyond the college s walls This volume outlines underlying values critical for neo leaders and offers questions leaders at various levels can use to jumpstart the type of courageous conversations needed on campus The tools presented in this book provide current and aspiring leaders with resources to prepare for successfully leading the way and developing new leaders to shape the future Our community colleges and their students require nothing less
