War Against Chaos:

The Strategic Air War Against Germany and Japan Haywood S. Hansell, 1986 **The Second Coming** Franco Berardi, 2019-07-12 We have entered the gateway to the apocalypse This theological concept is the best metaphor to describe the world in which we are already living Chaos is all around us political folly economical delirium ecological catastrophe intellectual cynicism technological simulation of life This is what Franco Bifo Berardi suggests in this wry dark disconcerting but also brilliant and invigorating journey through the main events that we have witnessed in recent years One century after the Communist revolution the very idea that the world could be changed for the better seems dead once and for all Every time that a new change occurs nowadays it seems to be a change for the worse But the fact that nothing can save us any more shouldn't be seen as a form of fatality or a reason for surrender On the contrary if our world is dead then the space is open for another to appear a world where apocalypse can shake us out of our zombie like contemporary existence The second coming of Communism will have nothing to do with 1917 Apocalypse has to be conceived of as a metaphor and Communism is a metaphor too the metaphor of the possible deployment of the potentials of the mind *The Revolt Against Civilization* Lothrop Stoddard, 1922 *The Art of War in an Asymmetric World* Barry Scott Zellen, 2012-06-28 This book examines the post Cold War security environment and how the U S has learned to wage war in this complex asymmetrical world of conflict

The War in the Air Herbert George Wells, 1917 *The War in the Air* Sir Walter Alexander Raleigh, Henry Albert Jones, 1937 **Nuclear Madness** Ira Chernus, 1991-02-12 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor It shows that public perceptions of the Bomb are a kaleidoscope of ever changing ideas and images Recent changes in public awareness only signal new symptoms of this public madness symptoms unwittingly fostered by the antinuclear movement Since the newest nuclear images follow the same psychological pattern as their predecessors they are likely to lead us deeper into nuclear madness Chernus offers new interpretations of four major theorists into the psychology of religion Paul Tillich R D Laing Mircea Eliade and James Hillman to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security The author develops an interpretation of Lifton's own thought as an ontological and religious psychology Drawing on the work of Eliade and Hillman he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation **A World History of War Crimes** Michael S. Bryant, 2021-01-28 The greatly expanded and enhanced 2nd edition of *A World History of War Crimes* provides an authoritative and accessible introduction to the global history of war crimes and the laws of war Tracing human efforts to limit warfare from codes of war in antiquity designed to maintain a religiously conceived cosmic

order to the gradual use in the modern age of the criminal trial as a means of enforcing universal humanitarian norms

Michael S Bryant's book is a masterful one volume account of the subject This new edition includes for the first time Two chapters providing extensive coverage of the Americas Africa and the Middle East Strengthened chronological boundaries a new chapter on the Incas Aztecs Mayan and North American Indian tribes as well as more material across all regions in ancient times discussion of contemporary war crimes committed in Afghanistan Iraq Myanmar and Syria A historiographical essay to broaden your understanding of the field An added final chapter focusing on the social cultural and psychological aspects of the subject A World History of War Crimes is vital reading for anyone needing to understand the history of war in one of its most significant contexts

The Methodist Quarterly Review ,1924 *Panzer Commander Hermann Balck* Stephen Robinson,2019-08-01 Panzer Commander Hermann Balck is an intriguing history of one of the world's greatest armoured warfare commanders During World War II Balck directed panzer troops from the front line and led by example putting himself in extreme danger when rallying his soldiers to surge forward He fought battles that were masterpieces of tactical operations utilising speed surprise and a remarkable ability to motivate his men to achieve what they considered to be impossible We follow his exciting journey through the fields of France the mountains of Greece and the steppes of Russia In Greece through flair and innovative leadership his soldiers overcome every obstacle to defeat determined Australian and New Zealand soldiers defending the narrow mountain passes This is also the story of a cultured and complex man with a great love of antiquity and classical literature who nevertheless willingly fought for Hitler's Third Reich while remaining strangely detached from the horrors around him
