Blueprints and Blood Hugh D. Hudson, Jr., 2015-03-08 Analyzing totalitarianism from below in a crucial area of Soviet culture Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people Through a study of the ideas and constructions of these visionary reformers Hudson explores their efforts to build new forms of housing and settlements designed to free the residents especially women from drudgery allowing them to participate in creative work and to enjoy the songs of larks Resolving to obliterate this movement of human liberation Stalinists in the field of architecture unleashed a little terror from below prior to Stalin s Great Terror Using formerly secret Party archives made available by perestroika Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims He shows for instance how they saw the necessity of bringing elite desires for a transformed world into harmony with the people s wish to preserve national culture Such goals brought their often divided movement into conflict with the Stalinists especially on the subject of collectivization Hudson s provocative work offers evidence that in spite of the ultimate success of the Stalinists the Bolshevik Revolution was not monolithic at one time it offered real architectural and human alternatives to the Terror Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while

Russian Architecture of the Soviet Period Андрей Владимирович Иконников,1988 Soviet Architecture, 1917-1987 ,1989 **Pioneers of Soviet Architecture** Selim Omarovich Khan-Magomedov,1987 **Landmarks of Soviet Architecture, 1917-1991** Aleksandr Vasil'evich Ri[a]bushin,Nadezhda Ivanovna Smolina,1992 Soviet architecture was born and shaped from the outset by dispute from the introductory essay This catalog documents the architectural output of a country besieged with powerful and conflicting political pressures and aspirations Text and photos combine to record the architectural heritage of the Communist regime Translated from the Russian Lacks an index 9 5x11 Annotation copyright by Book News Inc Portland OR Architecture in the Soviet Union Institute of International Education (New York, N.Y.),Paul Willen,1963 Spatial Revolution Christina E. Crawford,2022-02-15 Spatial Revolution is the first comparative parallel study of Soviet architecture and planning to create a narrative arc across a vast geography The narrative binds together three critical industrial residential projects in Baku Magnitogorsk and Kharkiv built during the first fifteen years of the Soviet project and followed attentively worldwide after the collapse of capitalist markets in 1929 Among the revelations provided by Christina E Crawford is the degree to which outside experts participated in the construction of the Soviet industrial complex while facing difficult topographies near impossible deadlines and inchoate theories of socialist space making Crawford describes how early Soviet architecture and planning activities were kinetic and negotiated and how questions about the proper distribution of people and industry under socialism were posed and refined through the construction of brick and mortar steel and concrete projects living laboratories that tested alternative spatial models As a result Spatial Revolution answers important questions of how the first Soviet industrialization drive was a catalyst for construction of thousands of new enterprises on remote sites across the Eurasian continent an effort that spread to far flung sites in other socialist states and capitalist welfare states for decades to follow Thanks to generous funding from Emory University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Architecture of the Stalin Era Alexei Tarkhanov,Sergei Kavtaradze,1992 Soviet Architecture of Today Андрей Владимирович Иконников,1975 **USSR Information Bulletin** ,1947 **Architecture of Life** Alla Vronskaya,2022-08-23 Explores how Soviet architects reimagined the built environment through the principles of the human sciences During the 1920s and 1930s proponents of Soviet architecture looked to various principles within the human sciences in their efforts to formulate a methodological and theoretical basis for their modernist project Architecture

of Life delves into the foundations of this transdisciplinary and transnational endeavor analyzing many facets of their radical approach and situating it within the context of other modernist movements that were developing concurrently across the globe Examining the theories advanced by El Lissitzky Moisei Ginzburg and Nikolay Ladovsky as well as those of their lesser known colleagues this illuminating study demonstrates how Soviet architects of the interwar period sought to mitigate Fordist production methods with other ostensibly more human oriented approaches that drew on the biological and psychological sciences Envisioning the built environment as innately connected to social evolution their methods incorporated aspects of psychoanalysis personality theory and studies in spatial perception all of which were integrated into an ideology that grounded functional design firmly within the attributes of the individual A comprehensive overview of the ideals that permeated its expanded project Architecture of Life explicates the underlying impulses that motivated Soviet modernism highlighting the deep interconnections among the ways in which it viewed all aspects of life both natural and manufactured

The Struggle for Utopia Victor Margolin, 1997 Focusing on the difficult relationship between art and social change Margolin brings important new insights to our understanding of the avant garde s role in a period of great political complexity Bulletin of Cultural Life in the U.S.S.R. , 1927 **Problems of Communism** , 1954

Constructivist Architecture in the USSR Anatole Kopp, 1985 *Soviet Architectural Avant-Gardes* Danilo Udovicki-Selb, 2020-05-14 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin s totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright s triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin s Terror **Architecture** , 1928 The professional architectural monthly varies
