

Antonio M. Peinado and José C. Segura

The book cover features a green background with a grid pattern. On the left, a person's profile is shown speaking. In the center, a computer monitor and a mobile phone are depicted. On the right, a radio tower stands against a bright light source. Concentric circles emanate from the light source, suggesting signal transmission. The title 'Speech Recognition' is prominently displayed in the center, with 'Speech' in white and 'Recognition' in yellow. Below the title, the subtitle 'over digital channels' is in a yellow rounded rectangle, and 'Robustness and Standards' is in white. The Wiley logo and name are at the bottom left, and the word 'book' is written diagonally at the bottom right.

Speech Recognition Over Digital Channels:

Speech Recognition Over Digital Channels Antonio Peinado, Jose Segura, 2006-08-04 Automatic speech recognition ASR is a very attractive means for human machine interaction The degree of maturity reached by speech recognition technologies during recent years allows the development of applications that use them In particular ASR shows an enormous potential in mobile environments where devices such as mobile phones or PDAs are used and for Internet Protocol IP applications *Speech Recognition Over Digital Channels* is the first book of its kind to offer a complete system comprehension addressing the topics of distributed and network based speech recognition issues and standards the concepts of speech processing and transmission and system architectures and robustness Describes the different client server architectures for remote speech recognition systems by means of which the client transmits speech parameters through a digital channel to a remote recognition server Focuses on robustness against both adverse acoustic environments in the front end and bit errors packet loss Discusses four ETSI standards for distributed speech recognition the understanding of the standards and the technologies behind them Provides the necessary background for the comprehension of remote speech recognition technologies This book will appeal to a wide ranging audience engineers using speech recognition systems researchers involved in ASR systems and those interested in processing and transmitting speech such as signal processing and communications communities It will also be of interest to technical experts requiring an understanding of recognition over mobile and IP networks and postgraduate students working on robust speech processing *Speech Processing in Mobile Environments* K. Sreenivasa Rao, Anil Kumar Vuppala, 2014-01-28 This book focuses on speech processing in the presence of low bit rate coding and varying background environments The methods presented in the book exploit the speech events which are robust in noisy environments Accurate estimation of these crucial events will be useful for carrying out various speech tasks such as speech recognition speaker recognition and speech rate modification in mobile environments The authors provide insights into designing and developing robust methods to process the speech in mobile environments Covering temporal and spectral enhancement methods to minimize the effect of noise and examining methods and models on speech and speaker recognition applications in mobile environments Mobile Multimedia Processing Xiaoyi Jiang, Matthew Y. Ma, Chang Wen Chen, 2010-03-25 The portable device and mobile phone market has witnessed rapid growth in the last few years with the emergence of several revolutionary products such as mobile TV converging iPhone and digital cameras that combine music phone and video functionalities into one device The proliferation of this market has further benefited from the competition in software and applications for smart phones such as Google's Android operating system and Apple's iPhone App Store stimulating tens of thousands of mobile applications that are made available by individual and enterprise developers Whereas the mobile device has become ubiquitous in people's daily life not only as a cellular phone but also as a media player a mobile computing device and a personal assistant it is particularly important to address challenges timely in

applying advanced pattern recognition signal information and multimedia processing techniques and new emerging networking technologies to such mobile systems The primary objective of this book is to foster interdisciplinary discussions and research in mobile multimedia processing techniques applications and systems as well as to provide stimulus to researchers on pushing the frontier of emerging new technologies and applications One attempt on such discussions was the organization of the First International Workshop of Mobile Multimedia Processing WMMP 2008 held in Tampa Florida USA on December 7 2008 About 30 papers were submitted from 10 countries across the USA Asia and Europe Digital Signal Processing Applications ,1999 **Proceedings of the Spoken Language Systems Technology Workshop** ,1995
