Otsuka,Donald F. Larson,2015-11-24 This book explores recent experiences in the effort to bring about a Green Revolution in
Sub Saharan Africa SSA The chapters focus on rice and maize which are promising and strategic smallholder crops
Significantly we find that an African Rice Revolution has already begun in many irrigated areas using Asian type modern
varieties chemical fertilizer and improved management practices Further we find that the same technological package
significantly increases the productivity and profitability of rice farming in rainfed areas as well We also find evidence that
that management training when done well can boost productivity on smallholder farms This suggests that African
governments can accelerate the pace of Africa s Rice Revolution by strengthening extension capacity The story for maize is
wholly different where most farmers use local varieties apply little chemical fertilizer and obtain very low yields However in
the highly populated highlands of Kenya a number of farmers have adopted high yielding hybrid maize varieties and chemical
fertilizer as was the case in the Asian Green Revolution apply manure produced by stall fed cows as was the case during the
British Agricultural Revolution and keep improved cows or cross breeds from European cows and local stock as was the case
of the Indian White Revolution We conclude that while rice in Africa has benefited from an Asian Green Revolution strategy
that emphasizes modern seeds inputs and focused knowledge transfers the success of Africa s Maize Revolution will require
a different system approach based on hybrid maize chemical and organic fertilizers and stall fed cross bred cows **Stata**

and Practices O. Olawale Awe,Eric A. Vance,2024-01-05 This volume gathers papers presented at the LISA 2020
Sustainability Symposium in Kumasi Ghana May 2 6 2022 They focus on sustainable methods and practices of using statistics
and data science to address real world problems From utilizing social media for statistical collaboration to predicting obesity
among rural women and from analyzing inflation in Nigeria using machine learning to teaching data science in Africa this
book explores the intersection of data statistics and sustainability With practical applications code snippets and case studies
this book offers valuable insights for researchers policymakers and data enthusiasts alike The LISA 2020 Global Network
aims to enhance statistical and data science capability in developing countries through the creation of a network of
collaboration laboratories also known as stat labs These stat labs are intended to serve as engines for development by

training the next generation of collaborative statisticians and data scientists providing research infrastructure for researchers data producers and decision makers and enabling evidence based decision making that has a positive impact on society The research conducted at LISA 2020 focuses on practical methods and applications for sustainable growth of statistical capacity in developing nations *Stata Reference Manual: P-St* Stata Corporation,2001 *Stata Reference Manual: H-O* ,1999
