State Liability Tort Law And Beyond:

State Liability Carol Harlow, 2004 The lectures presented in this volume examine the fast growing compensation culture and the consequential pressure on courts to widen the range of situations in which individuals can claim damages from the State Within domestic legal systems there has been a considerable extension of tortious liability which is impinging on the State and its resources These lectures address statutory and administrative compensation and examine the influence of group actions and of globalization Pressure on domestic legal systems has been increased by transnational courts notably the Court of Human Rights and the European Court of Justice Carol Harlow argues that this trend towards judicialization is undesirable and that greater use should be made of extrajudicial remedies She contends that the issue of compensation is too important to be left to the courts

Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly

representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation It appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation
