

STATE OF THE ART OF COMPUTER ANIMATION

A Spectacular Showcase of the Most Dramatic Synthetic Imagery Ever Created

If there is a frontier to the visual arts, it is computer animation. The **STATE OF THE ART OF COMPUTER ANIMATION** is a collection of the finest work being done in this form. Over thirty artists are represented

in works that range from exotic flights of fancy, to the ultra realism of simulators, to never seen before commercials. Some are just a few seconds long while others are full emotional dramas — displays of music, comedy, romance, and elegant and breathtakingly beautiful techniques.

Because the animation is entirely electronic, the computer artist is free to roam this micro world within the world and to create representations of objects, camera angles, lighting, motion, and colors that had been confined to the imagination... magic that Hollywood could only dream about — until now.

The result is a glimpse of the future and an unforgettable visual experience.
