Statistical Inference From Genetic Data On Pedigrees:

Statistical Inference from Genetic Data on Pedigrees Elizabeth Alison Thompson, 2000 Annotation While this monograph is not about show dogs or cats its statistical methods could be applied to tracing the pedigree of these species as well as humans Thompson U of Washington covers such topics as genetic models population allele frequencies kinship inbreeding coefficients and Monte Carlo estimation Includes supporting tables and figures Suitable as a supplementary text or primary text for advanced students Lacks an index c Book News Inc *Handbook on Analyzing Human Genetic Data* Shili Lin, Hongyu Zhao, 2009-10-13 The discipline of statistical genetics is highly computational Be it exact computational methods simulation based or a hybrid of the two computational packages are indispensable tools and constant companions of researchers in the field This handbook is intended to provide human geneticists and other biomedical researchers with guidance on selections of appropriate computational methods and software packages for their specific genetic problems It may also be used by students and other learners as a reference in conjunction with a more theoretical and or methodologically oriented text book This book tries to strike a balance between methodological expositions and practical guidelines for software selections Wherever possible comparisons among the competing methods and software are made to highlight the relative advantages and disadvantages of the approaches so that the reader can make informed choices to best match their specific needs Human genetics has been undergoing an evolution in the past several years as new knowledge and technologies are transforming the field leading to numerous new discoveries of genes associated with complex traits such as cancer obesity and diabetes Many recent genome wide association studies employ the case control design where the study subjects consist of unrelated affected individuals and normal controls For each individual a large number of genetic markers are queried
