Statistics Made Simple for School Leaders Susan Rovezzi Carroll, David J. Carroll, 2002-10-16 The chief executive officer of a corporation is not much different from a public school administrator While CEOs base many of their decisions on data for school administrators this type of research may conjure up miserable memories of searching for information to meet a graduate school requirement However the value of data based decision making will continue to escalate and the school community students teachers parents and the general public expect this information to come from their administrators Administrators are called on to be accountable but few are capable of presenting the mountain of data that they collect in a cohesive and strategic manner Most statistical books are focused on statistical theory versus application but *Statistics Made Simple for School Leaders* presents statistics in a simple practical conceptual and immediately applicable manner It enables

administrators to take their data and manage it into strategic information so the results can be used for action plans that benefit the school system The approach is user friendly and leaves the reader with a confident can do attitude to communicate results and plans to staff and the community
