WHAT IS UNCERTAINTY?

¿

Uncertainty refers to the lack of certainty or precise knowledge about a future event or situation.

It is the feeling of not knowing what will happen and how things will unfold.

Uncertainty can arise for various reasons, such as a lack of information, the complexity of a situation, or the unpredictability of outcomes.

In everyday life, uncertainty can generate anxiety and concern, as it implies the inability to predict with certainty what will happen. Facing uncertainty requires flexibility, adaptability, and the ability to make informed decisions in conditions of ambiguity.
