**Stellar Candles for the Extragalactic Distance Scale** Danielle Alloin, Wolfgang Gieren, 2003-10-20 This volume reviews the current status with respect to both theory and observation of the extragalactic distance scale A sufficient accuracy is required both for a precise determination of the cosmological parameters and also in order to achieve a better understanding of physical processes in extragalactic systems The standard candles used to set up the extragalactic distance scale reviewed in this book include cepheid variables RR Lyrae variables novae Type Ia and Type II supernovae as well as globular clusters and planetary nebulae

**Stellar Candles for the Extragalactic Distance Scale** Danielle Alloin, Wolfgang Gieren, 2014-03-12 This volume reviews the current status with respect to both theory and observation of the extragalactic distance scale A sufficient accuracy is required both for a precise determination of the cosmological parameters and also in order to achieve a better understanding of physical processes in extragalactic systems The standard candles used to set up the extragalactic distance scale reviewed in this book include cepheid variables RR Lyrae variables novae Type Ia and Type II supernovae as well as globular clusters and planetary nebulae

**Astronomical Applications of Astrometry** M. A. C. Perryman, 2009 The Hipparcos satellite developed and launched by the European Space Agency ESA in 1989 was the first space mission dedicated to astrometry the accurate measurement of positions distances and proper motions of stars Amongst the key achievements of its measurements are refining the cosmic distance scale characterizing the large scale kinematic motions in the Solar neighborhood providing precise luminosities for stellar modelling and confirming Einstein's prediction of the effect of gravity on starlight This authoritative account of the Hipparcos contributions over the last decade is an outstanding reference for astronomers astrophysicists and cosmologists It reviews the applications of the data in different areas describing the subject and the state of the art before Hipparcos and summarizing all major contributions to the topic made by Hipparcos It contains a detailed overview of the Hipparcos and Tycho Catalogues their annexes and their updates Each chapter ends with comprehensive references to relevant literature

*Planck Scale Effects in Astrophysics and Cosmology* Giovanni Amelino-Camelia, Jurek Kowalski-Glikman, 2005-06-13 This volume is composed of extensive and detailed notes from the lectures given at the 40th Karpacz Winter School This school focussed on quantum gravity phenomenology with emphasis on its relation to observational astrophysics and cosmology These notes have been carefully edited with the aim to give advanced students and young researchers a balanced and accessible introduction to a rather heavily mathematical subject

Post-Hipparcos Cosmic Candles Andre Heck, F. Caputo, 2012-12-06 In May 1976 when one of us was temporarily associated with Strasbourg Observatory for lecturing on distance determination methods Heck 1978 Pierre Lacroute then in his last year as Director there modestly requested comments on a project he had been cherishing for quite a few years and which he had been presenting to visitors and colleagues an astrometric satellite His persuasiveness and persistence won support from the scientific community from the French space agency CNES and from the European Space

Agency ESA the Hipparcos satellite was born It was fitting that Lacroute lived long enough after his retirement to attend the launch of his brainchild in 1989 and to see it successfully operational He knew however he would not enjoy the completion of this long and ambitious mission he passed away on 14 January 1993 a few days before reaching the age of 87 In May 1997 in the prestigious setting of San Giorgio Maggiore in Venice ESA organized a symposium celebrating the presentation of the Hipparcos and Tycho catalogues That conference signalled also the re lease of the first scientific results based at least partially on Hipparcos data An impressive proceedings volume Battrick 1997 of more than nine hundred pages gathering together almost two hundred contributions gave evidence of numerous studies in progress in addition to papers starting to appear in the classical journals The well maintained ESA Hipparcos web site <http://astro.estec.esa>

*Cosmic Matter* Siegfried Röser, 2008-09-26 This 20th volume in the series contains 16 invited reviews and highlight contributions presented during the 2007 International Scientific Conference of the German Astronomical Society on the topic of Cosmic Matter held in Würzburg Germany The papers published here discuss a wide range of hot topics including cosmology high energy astrophysics astroparticle physics gravitational waves extragalactic and stellar astronomy together representing the roadmap for astroparticle physics in Europe

**National Optical Astronomy Observatories Newsletter**, 2001

**Planetary Nebulae** Harm J. Habing, Henny J.G.L.M. Lamers, 2012-12-06 Planetary nebulae present a fascinating range of shapes and morphologies They are ideal laboratories for the study of different astrophysical processes atomic physics radiative transfer stellar winds shocks wind wind interaction and the interaction between stellar winds and the interstellar medium In addition planetary nebulae provide information about the late stages of stellar evolution In the last five years studies of planetary nebulae have progressed very rapidly and new phenomena and insights have been gained This is partly due to new observations e.g. from the Hubble Space Telescope the ISO satellite and new infrared and millimeter spectrographs and partly to the advancement of hydrodynamic simulations of the structures of planetary nebulae PN Many of these new results were reported at IAU Symposium 180 in Groningen the Netherlands on August 26 to 30 1996 This symposium was dedicated to one of the pioneers of PN research Stuart Pottasch These proceedings contain chapters on Introduction to PN with the basic parameters Distances of PN The central stars of PN The envelopes of PN The evolution from AGB to PN The evolution from PN to white dwarfs PN in the galactic context PN in extragalactic systems The future of PN research The book contains 29 reviews and more than 200 shorter contributions
