Stonehenge Barbara Bender, 1998-04 Unique in its approach this book offers a systematic account of the ways in which through time the Stonehenge landscape has been used and re used invested with new meanings and has given rise to stories

Bounded Wilderness Kathryn Jasper, 2024-10-15 In *Bounded Wilderness* Kathryn Jasper focuses on the innovations undertaken at the hermitage of Fonte Avellana in central Italy during the eleventh century by its prior Peter Damian d 1072

The congregation of Fonte Avellana experimented with reforming practices that led to new ways of managing property and relations among clergy nobles and the laity Jasper charts how Damian s notion of monastic reform took advantage of the surrounding topography and geography to amplify the sensory aspects of ascetic experiences By focusing on monastic landscapes and land ownership Jasper demonstrates that reform extended beyond abstract ideas Rather reform circulated locally through monastic networks and addressed practical concerns such as property boundaries and rights over water orchards pastures and mills Putting new sources both documentary and archaeological into conversation with monastic charters and Damian s letters *Bounded Wilderness* reveals the interrelationship of economic practices religious traditions and the natural environment in the idea and implementation of reform

Valuing Historic Environments Lianne Gibson, John Pendlebury, 2016-02-17 This volume brings together an interdisciplinary team of leading scholars to discuss frameworks of value in relation to the preservation of historic environments Starting from the premise that heritage values are culturally and historically constructed the book examines the effects of pluralist frameworks of value on how preservation is conceived It questions the social and economic consequences of constructions of value and how to balance a responsive democratic conception of heritage with the pressure to deliver on social and economic objectives It also describes the practicalities of managing the uncertainty and fluidity of the widely varying conceptions of heritage

The Ten Most Influential Buildings in History Simon Unwin, 2016-07-07 Even the most inventive and revolutionary architects of today owe debts to the past often to the distant past when architecture really was being invented for the first time Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated consciously or subliminally by particularly powerful buildings from history The Ten Most Influential Buildings in History Architecture s Archetypes identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries Each archetype is analysed through distinctive examples following the methodology established by the author in his previous books The variety of lines of enquiry each archetype has provoked in latter day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings Archetypes have a timeless relevance In adopting this approach The Ten Most Influential Buildings in History is as pertinent to contemporary practice as it is to understanding buildings from antiquity and offers insights into the bridges of influence that can operate between the two *The Journal of the Royal Anthropological Institute* ,2003 Articles on all aspects of anthropology *Antiquity* Osbert Guy Stanhope Crawford, 1928 Includes section Reviews *Claiming Sacred Ground* Adrian J.
