inspired by a remark of Mark Twain's to the effect that it was a pity that the best part of life came at the beginning and the worst part at the end. By trying the experiment upon only one man in a perfectly normal world I have scarcely given his idea a fair trial. Several weeks after completing it I discovered an almost identical plot in Samuel Butler's Note books. The story was published in Collier's last summer and provoked this startling letter from an anonymous admirer in Cincinnati: Sir, I have read the story Benjamin Button in Collier's and I wish to say that as a short story writer you would make a good lunatic. I have seen many peices of cheese in my life but of all the peices of cheese I have ever seen you are the biggest peice I hate to waste a peice of stationary on you but I will.

However until now information's philosophical history has been largely overlooked. *Information and the History of Philosophy* is the first comprehensive investigation of the history of philosophical questions around information including work from before the Common Era to the twenty first century. It covers scientific and technology centred notions of information, views of human information processing as well as socio political topics such as the control and use of information in societies. Organised into five parts, 19 chapters by an international team of contributors cover the following topics and more: Information before 500 CE including ancient Chinese, Greek and Roman approaches to information; Early theories of information processing; sources of information and cognition; Information and computation in Leibniz; visualised scientific information; copyright and social reform; The nineteenth century including biological information, knowledge economies and information's role in empire and eugenics; Recent and contemporary philosophy of information including racialised information; Shannon information and the very idea of an information revolution. *Information and the History of Philosophy* is a landmark publication in this emerging field. As such it is essential reading for students and researchers in the history of philosophy, philosophy of science and technology and library and information studies.
