Stormbird Rising Me 262:

Me 262 Hugh Morgan,1994 *Me 262* Hugh Morgan,1994 Designed by Willi Messerschmitt in 1938 the Me 262 was the world's first turbojet aircraft to enter combat First introduced to operational flying in June 1944 it was superior to its allied counterparts and could have changed the course of the World War II if it had been introduced earlier This book not only describes the history of the Me 262 in the 40s but also brings the story up to date by describing how Herbert Tischler the restorer of WWII aircraft is constructing flyable replicas of the Me 262 from the original designs Modelling the Messerschmitt Me 262 Robert Oehler,Brett Green,2012-04-20 This book showcases six different builds of the Me 262 across the scales from 1/72 to 1/32 across a range of skill levels It also features a comprehensive list of all the available kits and aftermarket products Broken Me 262 Jet Fighters Part 1 David Myhra PhD,2013-09-23 Photographs and information of unfinished war weary crash landed cannibalized new ones but all dead Messerschmitt Me262s found scattered all over the former Nazi Germany at the end of World War II 8may1945 Enjoy this nine part series *The Jet Race and the Second World War* S. Mike Pavelec,2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec's analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport **Modelling Luftwaffe Jets and Wonder Weapons** Brett Green,2012-11-20 A detailed guide to modelling the Luftwaffe jets and rocket planes that saw service at the end of World War II *Secret Weapons and World War II* Walter E. Grunden,2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate

industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East
