and the state Combining historical and theoretical analysis Vogl argues that over the last three centuries finance has become a fourth estate marked by the systematic interconnection of treasury and finance of political and private economic interests Against this historical background Vogl explores the latest phase in the financialization of government namely the dramatic transfer of power from states to markets in the latter half of the 20th century From the liberalization of credit and capital markets to the privatization of social security he shows how policy has actively enabled a restructuring of the economy around the financial sector Political systems are imprisoned by the regime of finance while the corporate model suffuses society enclosing populations in the production of financial capital The Ascendancy of Finance provides valuable and unsettling insight into the genesis of modern power and where it truly resides
