Thomas Griffiths

The Man With The Shattered World:

The Man with a Shattered World A. R. Luria, 1987-04-30 Luria presents a compelling portrait of a man's heroic struggle to regain his mental faculties. A soldier named Zasetky, wounded in the head at the battle of Smolensk in 1943, found himself unable to recall his recent past or speak, read, or write without difficulty. Woven throughout his first-person account are interpolations by Luria himself. *The Man Who Mistook His Wife for a Hat* Oliver Sacks, 2021-09-14 THE INSPIRATION FOR THE NBC SERIES BRILLIANT MINDS In his most extraordinary book, the bestselling author of *Awakenings* and poet laureate of medicine, *The New York Times* recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Oliver Sacks has become the world's best-known neurologist. His case studies of broken minds offer brilliant insight into the mysteries of consciousness. *The Guardian* Featuring a new preface, Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks's splendid and sympathetic telling, his patients are deeply human, and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: the suffering, afflicted, fighting human subject.

An Analysis of Oliver Sacks's *The Man Who Mistook His Wife for a Hat* and Other Clinical Tales Dario Krpan, Alexander O'Connor, 2017-07-05 In *The Man Who Mistook His Wife for a Hat*, neurologist Oliver Sacks looked at the cutting-edge work taking place in his field and decided that much of it was not fit for purpose. Sacks found it hard to understand why most doctors adopted a mechanical and impersonal approach to their patients and opened his mind to new ways to treat people with neurological disorders. He explored the question of deciding what such new ways might be by deploying his formidable creative thinking skills. Sacks felt the issues at the heart of patient care needed redefining because the way they were being dealt with hurt not only patients but practitioners too. They limited a physician's capacity to understand and then treat a patient's condition. To highlight the issue, Sacks wrote the stories of 24 patients and their neurological clinical conditions. In the process, he rebelled against traditional methodology by focusing on his patients' subjective experiences. Sacks did not only write about his patients in original ways; he attempted to come up with creative ways of treating them as well. At root, his method was to try to help each person individually, with the core aim of finding meaning and a sense of identity despite, or even thanks to, the patient's condition. Sacks thus redefined the issue of neurological work in a new way, and his ideas were so influential that they heralded the arrival of a broader movement: narrative medicine, that placed stronger emphasis on listening to and incorporating patients' experiences and insights into their care. **The Man with a Shattered World** Aleksandr Romanovič Lurija, 1972 Book Review Index, 1987 Every 3rd issue is a quarterly cumulation **Human**
