The Political Mapping Of Cyberspace:

The Political Mapping of Cyberspace Jeremy W. Crampton, 2003 This book is about the politics of cyberspace It shows that cyberspace is no mere virtual reality but a rich geography of practices and power relations Using concepts and methods derived from the work of Michel Foucault Jeremy Crampton explores the construction of digital subjectivity web identity and authenticity as well as the nature and consequences of the digital divide between the connected and those abandoned in limbo He demonstrates that it is by processes of mapping that we understand cyberspace and in doing so delineates the critical role maps play in constructing cyberspace as an object of knowledge Maps he argues shape political thinking about cyberspace and he deploys in depth case studies of crime mapping security and geo surveillance to show how we map ourselves onto cyberspace inexorably and indelibly Clearly argued and vigorously written this book offers a powerful reinterpretation of cyberspace politics and contemporary life [Political Mapping of Cyberspace](#) Jeremy

 Comprehensive and unique the first of its kind in human geography **Encyclopedia of Human Geography** Barney
 Warf,2006-05-16 Human geography in the last decade has undergone a conceptual and methodological renaissance that
 transformed it into one of the most dynamic and innovative of the social sciences Long a borrower of ideas from other
 disciplines geography has become a contributor in its own right and a spatial turn is evident in disciplines as diverse as
 Sociology Anthropology and Literary Criticism With more than 300 entries written by an international team of leading
 authorities in the field the Encyclopedia of Human Geography offers a comprehensive overview of the major ideas concepts
 terms and approaches that characterize a notoriously diverse field This multidisciplinary volume provides cross cultural
 coverage of human geography as it is understood in the contemporary world and takes into account the enormous conceptual
 changes that have evolved since the 1970s including a variety of social constructivist approaches Key Features Examines a
 range of themes characterizing different schools of thought and addresses long standing topics such as urban economic and
 medical geography as well as contemporary topics including feminism the social dimensions of GIS and the social
 construction of nature Explores many of the dualities that long characterized social science nature versus society the
 individual versus the social the historical versus the geographical consumption versus production and breaks them down
 using postmodern and poststructuralist approaches Illustrates how social and spatial structures draw upon people s daily
 lives which in turn structures their actions Looks at how globalization has manifested differently from place to place by
 discussing topics such as transnational capital international trade global commodity chains global cities international
 financial and telecommunications systems and how the global economy is reshaping geopolitics and governance Key Themes
