Transition To Democracy In Poland:

Transition to Democracy in Poland Richard Felix Staar, 1998 With the inclusion of new updated material this collection analyzes Poland's experiment in democratization from the points of view both of longtime observers of the country and of those who are actually carrying out this task The volume explores Polish party alignments mobilization elections leaders labour unions and the Church It discusses the range of issues encountered by those attempting to move Poland from a command to a free enterprise economy and the impact these issues will have upon international trade future membership of the European Community and security relations *Democracy in Poland* Anna Gwiazda, 2015-07-24 This book assesses the quality of democracy in Poland from the collapse of communism in 1989 up to the 2011 parliamentary election It presents an in depth empirically grounded study comparing two decades of democratic politics Drawing on democratic theory and comparative politics the book puts forward an evaluation of democracy based on four dimensions representation participation competition and accountability The book is an important contribution to debates on the performance of the new democracies in Central and Eastern Europe where some scholars argue that there is a democratic crisis that after a period of democratic progress most of these countries are experiencing democratic fatigue and that their democratic performance is poor However the Polish case shows that democracy is not in crisis in fact the quality of democracy in Poland has improved The book shows that democratic quality stems from good democratic institutions Moreover the Polish case shows useful lessons that can be learnt by democratic reformers in countries that are undergoing the transition to democracy or are aiming to consolidate their democratic systems It concludes that effective accountability good representation and stable competition are vital **The Transition to Democracy in Contemporary Europe**, 1990 [The Key Role of NATO Accession on Poland's Democratic Transition](#) Jaroslaw Jablonski, 2002-09-01 The accession of Poland into NATO in the spring of 1999 raises the question of how western attempts to transfer democratic institutions to new democracies in central Europe operated in reality as concerns reform and reaction Among the obstacles to this process was a western ignorance about domestic social challenges and political conflicts These go hand in hand with the process of democratic transition and show themselves starkly in the case of Polish politics society and military institutions in the years before 1999 While transitioning to democracy Poland experienced two types of threats one from civilian politicians who tried to use the military to accomplish their political goals and another from military officers with political ambitions After the collapse of communism in 1989 Polish military forces remained highly visible in domestic politics for almost a decade and the issue of civil military relations was at the center of government crises on three occasions Democratic civilian control over military a requirement to join NATO became one of the primary political goals of an overwhelming majority of Polish elites since society saw the membership as the best guarantee of national security and a peaceful future Politicians and government officials who didn't accept or understand this determination were eventually voted out dismissed or now exist on the fringes of political life

NATO's plan for Poland to move toward full membership in the alliance resulted in a peaceful democratic transition

The Political Culture of Poland in Transition Andrzej Jabłoński, Gerd Meyer, 1996

Poland in Transition Konstanty Adam Wojtaszczyk, 1999

The Politics of Central Europe Attila Ágh, 1998-06-10 This book provides a thorough introduction to East Central Europe and its renewed emergence since the momentous changes in the former Soviet bloc. By carefully differentiating between Central Europe, East Central Europe and the Balkans, Attila Ágh shows how the term Eastern Europe was a political misnomer of the Cold War. Drawing on theories of democratization to develop a common conceptual and theoretical framework, this textbook is the first to place the political and social changes of this complex region in a genuinely comparative perspective. Through broad thematic sections, the student is shown how to distinguish between processes of democratization and redemocratization, transition and transformation, and is introduced to the important issues of Europeanization, nation building, institutionalization, parties and political culture. Illustrated throughout with chronological charts and the latest data analysis, this is an invaluable guide to the emerging political systems and their future prospects at the core of the new Europe.

The Concept of Democracy in the Political Transformations of Central and Eastern Europe Maximilian Spinner, 2007-08 Seminar paper from the year 2003 in the subject Politics, Political Theory and the History of Ideas, Journal grade A, Central European University, Budapest, Dep of Political Science. 17 entries in the bibliography, language English, abstract. Based on the Hungarian and Polish cases of negotiated transition to democracy in 1989-90, this essay looks into the philosophical concept of democracy pursued by the main protagonists.

Transitions to Capitalism and Democracy in Russia and Central Europe M. Donald Hancock, John Logue, 2000-04-30 Hancock and Logue, along with their contributors, seek to explicate the achievements, problems, and prospects of simultaneous processes of economic and political transitions from communism to contrasting forms of market economies and democracy in Russia, Poland, the Czech Republic, Hungary, Slovenia, and eastern Germany. Contributors include 14 American and European scholars with intimate professional and personal familiarity with the various case studies. The contributors draw on process analysis and transition theory to explore different national approaches to privatization. This includes individual voucher schemes, the use of investment funds, the direct sale of former state-owned enterprises, employee buy-outs, direct foreign investments, and their consequences for parallel processes of marketization and democratization. A quarter of the volume is devoted to comparative analyses of contrasting modes of privatization, the role of public opinion and law in the transition process, and the international economic and
