Transmitting Culture:

Transmitting Culture Régis Debray, 2000 In a departure author Régis Debray redefines communication as the inescapable conditioning of civilization's meanings and messages by their technologies of transmission and lays the groundwork for a science of the transmission of cultural forms

Museums in a Digital Age Ross Parry, 2013-01-11 The influence of digital media on the cultural heritage sector has been pervasive and profound Today museums are reliant on new technology to manage their collections They collect digital as well as material things New media is embedded within their exhibition spaces And their activity online is as important as their physical presence on site However digital heritage as an area of practice and as a subject of study does not exist in one single place Its evidence base is complex diverse and distributed and its content is available through multiple channels on varied media in myriad locations and different genres of writing It is this diaspora of material and practice that this Reader is intended to address With over forty chapters by some fifty authors and co authors from around the world spanning over twenty years of museum practice and research this volume acts as an aggregator drawing selectively from a notoriously distributed network of content Divided into seven parts on information space access interpretation objects production and futures the book presents a series of cross sections through the body of digital heritage literature each revealing how a different aspect of curatorship and museum provision has been informed shaped or challenged by computing Museums in a Digital Age is a provocative and inspiring guide for any student or practitioner of digital heritage

Elements of Speech Communication David M. Jabusch, Stephen W. Littlejohn, 1996 Many of features that have always given The Elements of Speech Communication its character have been retained so that the feel of the book is about the same Every chapter begins with a story or provocative allusion Relevant photographs add interest and give pause for thought And of course the image shifts which have been unique to this book from its inception still challenge students to look at the subject in new ways

To make the text easier the authors have added a complete glossary A Collegiate Press book *Research for Social Justice* Elly Malihah, Tutin Aryanti, Vina Adriany, Hani Yulindrasari, Alicia Izharuddin, 2019-10-24 Individuals are equipped with a wide range of knowledge that enhances their employability health family life and social engagement On this basis providing equality for all has been set to be achieved as one of the United Nations sustainable development priorities However the international understandings are not only of what equality and inclusivity entail but also the social vision to achieve social justice Best practices provide a meaningful cross national discussion with respect to the following topics power relations within research social inequalities in society science research for social justice the redefinition of the notion of social justice education for social justice spatial justice the research of gender and marginalized groups the re conceptualization of the epistemological foundation of research hegemonic discourses on research science technology for social justice and welfare as well as culture and social justice This edited book aims to provide a new perspective for other benefits of research because generally the research carried out only aims to answer scientific problems and often override aspects of humanities In response to these concerns the book attempts to re map the main objectives of the research The authors in this book offer new perspectives especially in formulating the purposes of the studies they will perform Therefore this book presents a unique review of research with a variety of approaches that are coherent with the state of society in the world followed by eleven scopes of various cases from a variety of perspectives that highlight theoretical and methodological questions about research and social justice This book presents outstanding applications through multiple types of approaches that are relevant to the current context of world community issues The articles in this book will be of interest to undergraduate and graduate students as well as researchers who are interested in the social field especially research for social justice Social Learning and Innovation in Contemporary Hunter-Gatherers Hideaki Terashima, Barry S. Hewlett, 2016-10-22 This is the first book to examine social learning and innovation in hunter gatherers from around the world More is known about social learning in chimpanzees and nonhuman primates than is known about social learning in hunter gatherers a way of life that characterized most of human history The book describes diverse patterns of learning and teaching behaviors in contemporary hunter gatherers from the perspectives of cultural anthropology ecological anthropology biological anthropology and developmental psychology The book addresses several theoretical issues including the learning hypothesis which suggests that the fate of Homo sapiens and Neanderthals in the last glacial period might have been due to the differences in learning ability It has been unequivocally claimed that social learning is intrinsically important for human beings however the characteristics of human learning remain under a dense fog despite innumerable studies with children from urban industrial cultures Controversy continues on problems such as do hunter gatherers teach If so what types of teaching occur who does it how often under what contexts and so on The book explores the most basic and intrinsic aspects of social learning as well as the foundation of innovative activities in everyday activities of contemporary hunter gatherer

people across the earth The book examines how hunter gatherer core values such as gender and age egalitarianism and extensive sharing of food and childcare are transmitted and acquired by children Chapters are grouped into five sections 1 theoretical perspectives of learning in hunter gatherers 2 modes and processes of social learning in hunter gatherers 3 innovation and cumulative culture 4 play and other cultural contexts of social learning and innovation 5 biological contexts of learning and innovation Ideas and concepts based on the data gathered through an intensive fieldwork by the authors will give much insight into the mechanisms and meanings of learning and education in modern humans
