## **Tranter's Terrain:**

*Literature and Union* Gerard Carruthers, Colin Kidd, 2018-01-06 Literature and Union opens up a new front in interdisciplinary literary studies There has been a great deal of academic work both in the Scottish context and more broadly on the relationship between literature and nationhood yet almost none on the relationship between literature and unions This volume introduces the insights of the new British history into mainstream Scottish literary scholarship The contributors who are from all shades of the political spectrum will interrogate from various angles the assumption of a binary opposition between organic Scottish values and those supposedly imposed by an overbearing imperial England Viewing Scottish literature as a clash between Scottish and English identities loses sight of the internal Scottish political and religious divisions which far more than issues of nationhood and union were the primary sources of conflict in Scottish culture for most of the period of Union until at least the early twentieth century The aim of the volume is to reconstruct the story of Scottish literature along lines which are more historically persuasive than those of the prevailing grand narratives in the field The chapters fall into three groups 1 those which highlight canonical moments in Scottish literary Unionism John Bull Rule Britannia Humphry Clinker Ivanhoe and England their England 2 those which investigate key themes and problems including the Unions of 1603 and 1707 Scottish Augustanism the Burns Cult Whig Presbyterian and sentimental Jacobite literatures and 3 comparative pieces on European and Anglo Irish phenomena Tranter's Terrain Michael Pritchard, Alison Pritchard, 1994 This comprehensive companion details the recurring placenames which feature in Nigel Tranter's works Over 200 places are listed alphabetically with map references and associated passages from relevant novels provided for each entry **Waterstone's Guide to Scottish Books** Nick Rennison, Colette Bryce, 1998 *Paying the Piper* David Drake, 2002 In his popular Hammer's Slammers series Vietnam veteran Drake tells a military story like no other set on warring planets in need of the mercenary services of Colonel Hammer and his men **Nigel Tranter** Ray Bradfield, 1999 Here Nigel Tranter tells his story his strict religious upbringing in Edinburgh his father's financial ruin and premature death early writing success his happy marriage the tragedy of his son Philip's death and his crucial part in the return of the Stone of Destiny after its disappearance from Westminster Abbey in the 1950s 1873631766 *Scotland and the First World War* Gill Plain, 2016-11-14 What did war look like in the cultural imagination of 1914 Why did men in Scotland sign up to fight in unprecedented numbers What were the martial myths shaping Scottish identity from the aftermath of Bannockburn to the close of the nineteenth century and what did the Scottish soldiers of the First World War think they were fighting for *Scotland and the First World War Myth Memory and the Legacy of Bannockburn* is a collection of new interdisciplinary essays interrogating the trans-historical myths of nation belonging and martial identity that shaped Scotland's encounter with the First World War In a series of thematically linked essays experts from the fields of literature history and cultural studies examine how Scotland remembers war and how remembering war has shaped Scotland Developing Numeracy in

Further Education Graham Hall, Suzanne Slaney, 2016-10-03 This book presents examples of numeracy applications developed in a wide range of courses in a Further Education college in Wales The numeracy case studies are not limited to simple arithmetic and tasks involving shape and space but include more advanced topics such as statistical analysis mathematical modelling calculus and design of algorithms A broad definition of numeracy is adopted by the authors in line with the range of numeracy skills expected and valued by employers In addition to a knowledge of mathematical techniques numeracy is considered to include problem solving especially in the design of solutions to non routine tasks communication of mathematical results in formats which are suitable for the intended audience and facilitate decision making an ability to use computer technology to collect and process data and a familiarity with number which allows appropriate levels of accuracy to be chosen estimates made and errors detected
