Travel By Air:

Life in the Air Mark Gottdiener, 2001 This book is not just about air travel It is about the emergent social world of flying It concerns air space and behavior in the air the way someone else might look at cities and street behavior Economic political and cultural aspects are all considered Airports have now become specific places in their own right that in a certain sense now are very much like cities Frequent flying also has produced its very own culture Rules of behavior are subscribed to in the air Unique behaviors at terminals and in the passenger cabin have emerged that contrast with life on the ground In chapters below I explore these interesting aspects of etiquette eroticism and bi coastalism a human activity that is only possible because of our present society s evolution Only now have we begun to appreciate our emergent global culture The world is shrinking just as the opportunities for travel expand
