Wind Energy Basics Paul Gipe, 2009-05-05 The availability of clean renewable power is without question going to be the defining challenge and goal of the 21st century and wind will lead the way Internationally acclaimed wind energy expert Paul Gipe is as soberly critical of past energy mistakes as he is convincingly optimistic about the future The overwhelming challenge of transforming our world from one of fossil carbon to one of clean power seems daunting at best and paralyzingly impractical at worst *Wind Energy Basics* offers a solution Wind power can realistically not only replace the lion's share of oil coal and natural gas fired electrical plants in the U S but also can add enough extra power capacity to allow for most of the cars in the nation to run on electricity Gipe explains why such a startlingly straightforward solution is eminently doable and can be accomplished much sooner than previously thought and will have the capacity to resuscitate small and regional economies *Wind Energy Basics* offers a how to for home based wind applications with advice on which wind turbines to choose and which to avoid He guides wind energy installers through considerations such as renewable investment strategies and gives cautionary tales of wind applications gone wrong And for the activist he suggests methods of prodding federal state and provincial governments to promote energy independence
