

Suppose it is reasonable to assume that the 65 boxes purchased by the students are a random sample of all boxes of this cereal. Based on this sample, is there support for the students' belief that the proportion of boxes with vouchers is less than 0.2? Provide statistical evidence to support your answer.

$H_0: p = 0.2$
 $H_a: p < 0.2$

Assume significance level $\alpha = 0.05$

Sample

$n = 65$
 $\hat{p} = \frac{11}{65} \approx 0.169$

P-value $> \alpha$
 $0.266 > 0.05$

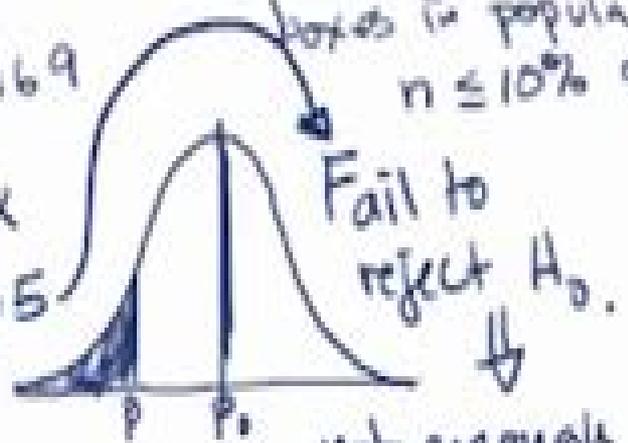

Conditions for Inference

✓ Random - stated in problem that Random Sample taken

✓ Normal - $np_0 \geq 10 + n(1-p_0) \geq 10$

$65 \cdot 0.2 = 13$ $65 \cdot 0.8 = 52$
 $13 \geq 10 \checkmark$ $52 \geq 10 \checkmark$

✓ Independence: Going to assume more than 650 boxes in population $\Rightarrow n \leq 10\%$ of population

not enough evidence to suggest H_a

Sampling Dist of \hat{p}

$\mu_{\hat{p}} = p_0$ $\sigma_{\hat{p}} = \sqrt{\frac{p_0(1-p_0)}{n}}$

$= \sqrt{\frac{0.2 \cdot 0.8}{65}}$
 ≈ 0.0496

Z-value

$z = \frac{\hat{p} - p_0}{\sigma_{\hat{p}}} = \frac{0.169 - 0.2}{0.0496}$

P-value = $P(\hat{p} \leq 0.169 | H_0 \text{ true})$
 $= P(z \leq -0.625) \approx \boxed{0.266}$

Statistics Problems Of Modern Life

Statistics Problems Of Modern Life:

Economic Problems of Modern Life S. Howard Patterson, Karl William Henry Scholz, 1927 [Economic Problems of Modern Life](#), by S. Howard Patterson ... and Karl W. H. Scholz ... Samuel Howard Patterson, 1927 [Anthropology And Modern Life](#) Franz Boas, 2025-11-14 This edition has been fully restored with modern typesetting custom cover design In Anthropology and Modern Life Franz Boas presents anthropology as a critical discipline for understanding humans as integral parts of social groups challenging misconceptions that it merely studies exotic customs Boas argues that anthropology provides crucial insights into contemporary societal issues emphasizing its relevance in modern life by connecting individual experiences to broader social dynamics He stresses the importance of studying individuals within their social contexts and how fields like psychology linguistics and economics must consider group dynamics to truly understand human behavior The book explores complex themes such as race nationalism eugenics criminology and cultural stability Boas critiques the simplistic categorization of racial types based on superficial characteristics arguing for a more nuanced understanding of heredity and ancestry He highlights the historical mixing of populations challenging the notion of pure races and emphasizes that human variation is largely shaped by specific family lines and environmental influences rather than broad racial classifications Boas also critiques the practicality and ethics of eugenics arguing that societal improvement cannot rely solely on genetic selection Instead he advocates for addressing social conditions warning against the dangers of pursuing eugenic ideals that could lead to societal collapse by prioritizing self perfection over human diversity and experience Furthermore Boas examines the fluid nature of crime suggesting that criminality is defined by societal norms and influenced by social and environmental pressures While certain predispositions may be hereditary Boas insists that criminal behavior itself is not inherited calling for a reevaluation of morality and justice in light of social conditions Through these discussions Boas underscores the interconnectedness of human experiences and the anthropological roots of contemporary challenges [Political Atlas of the Modern World](#) Andrei Melville, Yuri Polunin, Mikhail Ilyin, Mikhail Mironyuk, Ivan Timofeev, Elena Meleshkina, Yan Vaslavskiy, 2011-08-02 The Political Atlas of the Modern World is a unique reference source which addresses these questions by providing a comparative study of the political systems of all 192 countries of the world Uses quantitative data and multidimensional statistical analysis Ranks countries according to five indices of political development stateness external and internal threats potential of international influence quality of life institutional basis of democracy Illustrated throughout with tables and diagrams **Some Economic Factors in Modern Life** Sir Josiah Stamp, 1929 [Social Science Abstracts](#) ,1930 [Public Documents of Massachusetts](#) Massachusetts, 1910 **The Annals of the American Academy of Political and Social Science** ,1927 **Annals of the American Academy of Political and Social Science** ,1927 [Central Banking in the Modern World](#) Marc Lavoie, Mario Seccareccia, 2004-01-01 The book provides a good variety of articles capable of satisfying different readers regarding central banking Eric Tymoigne Journal of

Economic Issues According to the New Consensus in monetary economics monetarism is dead and central bankers target low inflation rates by acting upon short term real rates of interest Yet this synthesis hinges on variants of the long run vertical Phillips curve originally proposed by Milton Friedman the father of old line monetarism Contributors to this volume question this New Consensus While they agree that the money supply should be conceived as endogenous they carefully examine the procedures pursued by central banks the monetary policy transmission mechanisms suggested by central bankers themselves and the assumptions imbedded in the New Consensus They propose alternative analyses that clearly demonstrate the limits of modern central banking and point to the possible instability of monetary economies
