Stomatal Physiology:

Stomatal Physiology P. G. Jarvis, T. A. Mansfield, Society for Experimental Biology (Great Britain), 1981-08-13 This volume contains papers on anatomy physiology and action of stomata *Physiology of Stomata* Hans Meidner, Terence Arthur Mansfield, 1968 *The Physiology of Stomata* Francis Ernest Lloyd, 1908 Stomatal Function Eduardo Zeiger, G. D. Farquhar, I. R. Cowan, 1987 A Stanford University Press classic *The Physiological Properties of Plant Protoplasts* Paul-Emile Pilet, 2012-12-06 The idea for the present book arose from a 3 day seminar which I organized in March 1984 for young research workers in plant physiology Participants came from several universities of the French speaking part of Switzerland and speakers from Basel Mtinchen Nottingham Perpignan Regensburg Sheffield Toulouse Yale ZUrich and Lausanne The theme of the seminar was chosen from the range of research fields of our Institute Meanwhile feeling it was important to bear in mind that some of our hearers were not specialists in the chosen topic I wished to provide a subject that would be of scientific methodological and epistemological interest The critical analysis of the structural and functional characteristics of plant protoplasts exactly met these criteria There exists ample material for discussion of the techniques of protoplast preparation methods used in morphological biological and biochemical studies and for the comparison of protoplasts with the cells from which they are obtained **Advances in Botanical Research**, 1997-03-07 Advances in Botanical Research is a multi volume publication that brings together reviews by recognized experts on subjects of importance to those involved in botanical research For more than thirty years Advances in Botanical Research has earned a reputation for excellence in the field For those working on plant pathology Advances in Plant Pathology has also carved a niche in the plant sciences during its decade of publication Academic Press has merged Advances in Plant Pathology into Advances in Botanical Research The plant science community will find that the merger of these two serials will provide one comprehensive resource for the field To ensure complete coverage John Andrews and Inez Tommerup the editors of Advances in Plant Pathology have joined the editorial board of the new series which will include equal coverage of plant pathology and botany in both thematic and mixed volumes The first few volumes of the new series will be slanted toward botany or plant pathology however future eclectic volumes will be fully integrated The resulting synergy of these two serials greatly benefits the plant science community by providing a more comprehensive resource under one roof The joint aim is to continue to include the very best articles thereby maintaining the status of a high impact factor review series *Flow and Transport in the Natural Environment: Advances and Applications* William L. Steffen, Owen T. Denmead, 2012-12-06 This volume arises from an International Symposium on Flow and Transport in the Natural Environment held in Canberra Australia in September 1987 The meeting was hosted by the CSIRO Division of Environmental Mechanics now the Centre for Environmental Mechanics to mark the opening of the second stage of its headquarters the F C Pye Field Environment Laboratory twenty one years after the opening of the first stage Those twenty one years have seen much progress in our

understanding of the physics of the natural environment and the occasion provided an ideal opportunity to review advances in our knowledge of flow and transport phenomena particularly with regard to flow and transport in soils plants and the atmosphere The contents of this volume are based very closely on the Symposium s program Undoubtedly our choices of topics were idiosyncratic but we believe that those we have selected exhibit progress innovation and much scope for practical application Rather than being encyclopaedic we have sought to deal with thirteen selected topics in depth

Water Relations of Plants and Soils Paul J. Kramer, John S. Boyer, 1995-07-17 Water Relations of Plants and Soils successor to the seminal 1983 book by Paul Kramer covers the entire field of water relations using current concepts and consistent terminology Emphasis is on the interdependence of processes including rate of water absorption rate of transpiration resistance to water flow into roots soil factors affecting water availability New trends in the field such as the consideration of roots rather than leaves as the primary sensors of water stress are examined in detail Addresses the role of water in the whole range of plant activities Describes molecular mechanisms of water action in the context of whole plants Synthesizes recent scientific findings Relates current concepts to agriculture and ecology Provides a summary of methods

Environmental and Biological Control of Photosynthesis R. Marcelle, 2012-12-06 This book reports the proceedings of a meeting held in the Limburgs Universitair Centrum Diepenbeek Belgium August 26 to 30 1974 In convening this meeting my aim was to bring together a small number of specialists working on photosynthesis of course but also always keeping in mind that plants are influenced by their environment temperature light quality and intensity air composition daylength and can differently react according to their stage of development In general all these specialists work on whole plants cultivated in well known conditions they are not market spinach specialists but when necessary give up the idea of measuring photochemical activities in isolated chloroplasts enzyme kinetics etc It is noticeable that about 50% of them are working in laboratories directly involved with applied research in agriculture or forestry The format of the meeting was intentionally kept small but it allowed generous time for discussion thanks are due to Drs O B J R K M A N J W B R A D B E E R M M L U D L O W and C B O S M O N D for taking the chairs during these discussions In such a small meeting the choice of invited scientists was really a personal one and thus reflected my own fields of interest When planning the conference I was continually divided between the wish for inviting other interesting people and the necessity of keeping time free for discussions
