*Storied Lives* George C. Rosenwald, Richard L. Ochsberg, 1992-01-01 The stories people tell about themselves are interesting not only for the events and characters they describe but for something in the construction of the stories themselves The ways in which individuals recount their histories what they emphasize and omit their stance as protagonists or victims the relationship the story establishes between teller and audience all shape what individuals can claim of their own lives Personal stories are not merely a way of telling someone or oneself about one's life they are the means by which identities may be fashioned from the Introduction In this provocative book psychologists anthropologists and sociologists analyze interviews with a range of subjects a minister who uses the death of his son to reaffirm his identity as a man of God women who have given up their children at birth for adoption and who blame society for their action Holocaust survivors a victim of marital rape and many others Together these studies suggest a new way of thinking about autobiographical narratives that these life stories play a significant role in the formation of identity that the way they are told is shaped and at times curtailed by prevalent cultural norms and that the stories and at times the lives to which they relate may be liberated from their psychic and social constraints if the social conditions of story telling can be critically engaged Presenting a wide range of life stories these studies demonstrate how telling one's life has the potential to clarify or mystify one's commitments and to animate or encumber one's future development

Adams* Bertha Jane Laffan,1880     Narrative and Morality Paul Nelson,1987 This book analyzes a rich and diverse body of philosophical and theological literature concerning the import of narrative for the understanding of morality Nelson begins by examining the theses that to understand oneself a tradition and history as a whole they must be understood in the context of a narrative Recent philosophical writings on the relation of narrative to the moral concepts of social groups and individuals including Alasdair MacIntyre s proposal for the rehabilitation of an ethic of virtue shaped by narrative are explored Issues discussed include the freedom of moral agents in relation to their narratives the relation between narrative and universal moral rules and the problem of relativism Next Nelson classifies theological uses of narrative as belonging to either a liberal universalistic or postliberal particularistic tradition and considers the implications of construing scripture as narrative for the problematic relation between scripture and ethics The work of Stanley Hauerwas the foremost narrativist in Christian ethics is analyzed at length Nelson argues that while narrative is a necessary focus it does not exhaust the methodological agenda Narrative is not as its advocates sometimes suggest a universal solvent for every theological problem and disagreement An adequate Christian ethics must not lose sight of the universal narrative independent features of morality Since the realm of the moral is an interweaving of narrative dependent and narrative independent features Christian ethics stands to profit from both narrativist coherentist and rationalist foundationalist insights The role of narrative is demonstrably a major topic of conversation across several fields in religious studies today Particularly designed for scholars in ethics theology and the philosophy of religion the book is a reliable guide to an expanding literature and a judicious introduction to these interdisciplinary discussions     Lower Wharfedale Harry Speight,1902     *The Works of Oliver Wendell Holmes ...* Oliver Wendell Holmes,1892     **Wee Willie Winkie and other stories. c1895.
