The MacIntyre Reader:

The MacIntyre Reader Kelvin Knight, 1998-10-23 Alasdair MacIntyre is one of the most controversial philosophers and social theorists of our time He opposes liberalism and postmodernism with the teleological arguments of an updated Thomistic Aristotelianism It is this tradition he claims which presents the best theory so far about the nature of rationality morality and politics This is the first Reader of MacIntyre's work It includes extracts from and synopses of two famous books from the 1980s *After Virtue* and *Whose Justice Which Rationality* as well as the whole of several shorter works one published for the first time in English and two interviews Taken together these constitute not only a representative collection of his work but also the most powerful and accessible presentation of his arguments yet available The Reader also includes a summary by the editor of the development of MacIntyre's central ideas and an extensive guide to further reading Students will find the book a useful guide to MacIntyre's case against both capitalist institutions and academic orthodoxies [The RoutledgeFalmer Reader in the Philosophy of Education](#) Wilfred Carr, 2021-04-29 This Reader brings together a wide range of material to present an international perspective on topical issues in philosophy of education today Focusing on the enduring trends in this field this lively and informative Reader provides broad coverage of the field and includes crucial topics With an emphasis on contemporary pieces that deal with issues relevant to the immediate real world this book represents the research and views of some of the most respected authors in the field today Wilfred Carr also provides a specially written introduction which provides a much needed context to the role of philosophy in the current educational climate Students of philosophy and philosophy of education will find this Reader an important route map to further reading and understanding [MacIntyre's After Virtue at 40](#) Tom Angier, 2023-10-25 Since its publication in 1981 Alasdair MacIntyre's *After Virtue* has been recognised as a classic Primarily a work of moral philosophy it also draws on sociology classics political science and theology to effect a unique intellectual synthesis and its combination of erudition and challenging even provocative argument has made a significant impact throughout the humanities disciplines This volume of new essays unpacks the influence of *After Virtue* on ethical and political theory sociology and theology and offers a multi faceted exploration of its significance The essays offer a way into MacIntyre's philosophy and demonstrate how rather than waning in influence over the past forty years his most seminal text has found an ever wider audience and continues to inspire controversy and debate in the humanities **Marxism, the Millennium and Beyond** M. Cowling, P. Reynolds, 2000-10-31 This collection investigates the state of play in studies informed by Marxism Among other contributions it includes an essay on state theory by Bob Jessop a discussion of fundamental socialist values using analytical Marxism by Alan Carling **A Liberalism Safe for Catholicism?** Daniel Philpott, Ryan T. Anderson, 2017-06-30 This volume is the third in the *Perspectives from The Review of Politics* series following *The Crisis of Modern Times* edited by A James McAdams 2007 and *War Peace and International Political Realism* edited by Keir Lieber 2009 In *A Liberalism Safe for Catholicism* editors Daniel Philpott

and Ryan Anderson chronicle the relationship between the Catholic Church and American liberalism as told through twenty seven essays selected from the history of the Review of Politics dating back to the journal's founding in 1939. The primary subject addressed in these essays is the development of a Catholic political liberalism in response to the democratic environment of nineteenth and twentieth century America. Works by Jacques Maritain, Heinrich Rommen, and Yves R. Simon forge the case for the compatibility of Catholicism and American liberal institutions including the civic right of religious freedom. The conversation continues through recent decades when a number of Catholic philosophers called into question the partnership between Christianity and American liberalism and were debated by others who rejoined with a strenuous defense of the partnership. The book also covers a wide range of other topics including democracy, free market economics, the common good, human rights, international politics, and the thought of John Henry Newman, John Courtney Murray, and Alasdair MacIntyre, as well as some of the most prominent Catholic thinkers of the last century among them John Finnis, Michael Novak, and William T. Cavanaugh. This book will be of special interest to students and scholars of political science, journalists, and policymakers, church leaders, and everyday Catholics trying to make sense of Christianity in modern society.

Towards a Post-Modern Understanding of the Political A. Bielskis, 2005-08-19. While claiming that liberalism is the dominant political theory and practice of modernity, this book provides two alternative post-modern theoretical approaches to the political. Concentrating on Nietzsche's and Foucault's work, it offers a novel interpretation of their genealogical projects. It argues that genealogy can be applied to analyze different forms of cultural kitsch vis-à-vis the dominant political institutions of consumer capitalism. The problem with consumer capitalism is not so much that it exploits individuals but that it fosters cheap human existence saturated with the artefacts of kitsch. Contrasting genealogy with hermeneutic philosophy, it calls for a renewal of hermeneutics within the Thomistic tradition.

1956 and All that Keith Flett, 2007. Through the Smoke of Budapest: 50 Years On. The February 2006 Conference of the London Socialist Historians Group was held at the Institute of Historical Research in central London, one of a series of such conferences over the previous ten years. Assembled were a modest group of academics and activists who came to mark the 50th anniversary of the events of 1956 and to do so in a particular way. Firstly by presenting new historical research on the questions under review rather than trotting out tired orthodoxies. Secondly by linking historical inquiry to political

activism It was queried why such a conference was held in February 2006 rather than in the autumn and the answer was a simple one To intervene historically in the debates of the year by setting a socialist historical agenda for doing so The opening plenary heard from Sami Ramidani an Iraqi exile now lecturing at a British University from Stan Newens who had been present at the protests in 1956 and from Nigel Wilmott the letters editor of the Guardian but here speaking about Hungary The flavour was one both of historical recall of the events of 1956 and of contemporary political parallels Indeed during this session news came through via text message that the left wing MP George Galloway had been detained in a Cairo jail overnight and an emergency protest called at the Egyptian Embassy for later in the day The next two sessions focused on the key moments of autumn 1956 Hungary and Suez but again with new research examining their wider significance Mike Haynes looks at the origins of the Hungarian revolt in terms of workplace politics while Anne Alexander reviews the impact that Suez had on Nasser's reputation within the Arab world and Arab nationalist politics In the afternoon there was a widening of the focus One session examined the impact of the events of 1956 on left wing organisation and in particular the orthodox Communist or Stalinist tradition Terry Brotherton took a fresh look at the impact of 1956 on the Communist Party of GB while Toby Abse focused on how the events of that year worked their way through in the largest of the Western European CPs the Italian Alan Woodward examined how the crisis of Stalinist politics opened new possibilities for libertarian left wing ideas The other focused on the rise of a new left as a result of the crisis of 1956 Paul Blackledge examined the development of the theory of socialist humanism by E P Thompson and others as an alternative to Stalinism Neil Davidson examined the ideas of a forgotten left wing thinker from this period Alisdair Macintyre while Christian Hogsberg reviewed the influence of an existing Trotskyist theorist CLR James around the events of 1956 Of course the conference could not hope to cover the huge range of possible historical issues arising from the 50th anniversary of 1956 The beginnings of the consumer society and the age of affluence the birth of youth culture and rock music British nuclear tests and the origins of CND and campaigns against the bomb the new theatre marked by look back in anger In an introduction the editor Keith Flett reviews some of these wider trends However the research agenda proposed by the conference was and remains an important one
