The Market For Aid:

The Market for Aid Michael U. Klein, Tim Harford, 2005 This timely volume offers in an accessible and engaging style digestible surveys on some of the hottest topics in the aid industry today Klein and Harford examine the supply of aid and the demand for loans the grants versus loans debate debt restructuring in developing countries aid effectiveness and the role of the private sector The authors also present two scenarios for the future of the aid industry a world of booming private remittances and nongovernmental aid flows put to innovative uses Or a world with falling numbers of people in absolute poverty where aid agencies are forced to cooperate to survive The authors argue that the aid industry is changing old models of aid are under pressure and both donors and recipients will ask more and more of aid agencies in future The chaos of competition and the search for new ideas is frightening to some and risks harming the people who the industry is supposed to benefit Yet at the same time there is a tremendous opportunity to harness competition to improve performance and find better ways of helping the poor

The Market for Aid Tim Harford, Michael Klein, 2012 The market for aid is changing These days donors use a far greater array of instruments than in the past and operate in a context of far larger private financial flows Poor countries are growing richer but there are legitimate doubts about whether the aid industry deserves credit Measurement of the effectiveness of aid has not yet produced some of the results that would really help such as credible ratings of aid agencies or rigorous randomized trials of specific programs This information might pull the aid debate away from minimizing the costs of aid competition and toward trying to maximize the benefits widespread experimentation and innovation

Market for Aid Tim Harford, 2005 *Economics, Ethics and the Market* Johan J.
