The Pew Group Anthony Oliver, 1985 Personalized Nutrition in Chronic Kidney Disease, 2nd edition Lara Caldiroli, Alice Sabatino, Andreana De Mauri, 2024-11-08 Nutritional status is a crucial prognostic factor in chronic kidney disease CKD patients. The nutritional approach depends on the stage of renal disease, patients' comorbidities, proteins catabolism, and the presence of malnutrition. The gradual and progressive worsening of kidney function, characterized by a reduced glomerular filtration rate, carries many challenges for both young and elderly patients. Dietetic Nutritional Therapy (DTN) has an important role in the prevention and in the progression of Chronic Kidney Disease. An appropriate nutritional approach contributes to the prevention and control of signs, symptoms, and metabolic complications of CKD, such as hyperkalemia, hyperphosphatemia, and metabolic acidosis. It also helps avoid malnutrition and protein energy wasting (PEW). Several dietary approaches have been proposed, but the most successful nutritional regimen is the one tailored to patients' needs. This Research Topic is open for original articles, narrative review, systematic review, and meta-analysis focusing on personalized nutrition in patients with CKD on both conservative and replacement treatments. Suggested topics relating to renal nutrition and chronic kidney disease may include, but are not limited to: Use of amino acids or keto analogues; supplementation in CKD patients in conservative therapy or in dialysis; Strategies to improve dietary adherence; Psychological aspects of nutritional adherence; Nutritional indications in inflamed CKD patients; Interaction between diet, microbiota, and comorbidities; Personalized nutritional counseling; Strategies to avoid malnutrition and PEW.

Maritime Sri Lanka: Historical And Contemporary Perspectives Chulanee Attanayake, 2021-01-18 Being an island nation, the ocean is never too far from Sri Lanka. Situated right at the center of the world's busiest sea lanes of communication, the geography connects the country with the Indian Ocean, and its destiny is linked to this strategic body of water. For centuries, the Indian Ocean has been part of Sri Lanka's strategic security and political narratives. However, over the years, the country's involvement in the affairs of the Indian Ocean has retracted due to domestic and regional circumstances. Its consciousness of its ocean identity declined when it took an inward orientation, which gave greater visibility to its South Asian identity and its own imagination began to pivot towards the Indian hinterland. However, with the rising importance of the Indian Ocean in geopolitics and with the end of the civil war, Sri Lanka's consciousness of its ocean identity has grown. Successive governments have formulated policies that would have paved its way to become the hub of the Indian Ocean, making the ocean the center of its economic development, maritime security, and defense relations. Amidst this backdrop, this book explores historical and contemporary perspectives on Sri Lanka's relations with the Indian Ocean.
