The Plight Of Queen Bee:

Queen of the Sun Taggart Siegel, 2012-12-17 In Autumn 2006 an unnerving phenomenon hit the United States honeybees were mysteriously disappearing from hives across the nation with beekeepers reporting losses of between 30 and 90 per cent of their entire colonies The problem soon spread to parts of Europe and even Asia earning the name Colony Collapse Disorder To this day nobody is absolutely sure why it is happening and what the exact causes are However in 1923 Rudolf Steiner a scientist philosopher and social innovator predicted that bees would die out within 100 years if they were to be reproduced using only artificial methods Startlingly and worryingly his prediction appears to be coming true Queen of The Sun What Are the Bees Telling Us is a companion book to the critically acclaimed film of the same name Compiled by the film s director Taggart Siegel it makes a profound examination of the global bee crisis through the eyes of biodynamic and organic beekeepers scientists farmers philosophers and poets Revealing the mysterious world of the beehive and the complex social community of bees the book unveils millennia of beekeeping highlighting our historic and sacred relationship with bees and how this is being compromised by highly mechanized and intensive agro industrial practices The bees are messengers and their disappearance is a resounding wake up call for humanity With full colour stunning photography throughout this engaging alarming but ultimately uplifting anthology begins with an account of how Siegel s film came to be made It continues with a wealth of articles interviews and poems that offer unique philosophical and spiritual insights Besides investigating many contributory causes of Colony Collapse Disorder the book offers remedies as well as hope for the future Queen of the Sun features contributions from Taggart Siegel Jon Betz David Heath Gunther Hauk Horst Kornberger Jennifer Kornberger Jacqueline Freeman Johannas Wirz Kerry Grefig Michael Thiele Raj Patel Vandana Shiva Jeffery Smith and Matthew Barton These compelling voices signal a growing movement striving to found a culture fully in balance with nature

Telling the Bees Dominic Pettman,2024-12-03 In a bid to wean himself off Facebook and Twitter media scholar and cultural theorist Dominic Pettman decided to revive an ancient custom He decided to tell the local bees of his thoughts theories musings and meditations The result was an apian journal that parses the daily news and the routines of modern life in a more sustained and reflective way than the Pavlovian posts to which we are so addicted The account that emerges from Pettman s regular discussion with the bees forms a compelling portrait of the tumultuous period running from the Fall of 2019 to New Year s Eve 2022 What began as a reflection on the traumatic effects of an unprecedented presidency soon evolved into a real time response to the equally extraordinary events of the pandemic and its aftermath One key concern that emerges from Pettman s ongoing discussion with the bees is the extent to which thanks to the alienating effects of neoliberalism we were already engaged in an advanced form of social distancing long before anyone had heard of COVID Other key themes include education human animal relations climate change mediated intimacy attention ecologies collective memory slow violence the self fulfilling prophecy that is New York City the never ending end of history and the mundane strategies we share in a bid to forge on despite the accumulating challenges of the twenty first century Telling the Bees is an invitation to rediscover the art of reflection and a profound meditation on human connection alienation and our collective yearning for intimacy in an age of distance Through what Pettman describes as an interspecies monologue readers are treated to a unique perspective on navigating the complexities of the twenty first century inspired by the ingenuity and resilience of our natural cohabitants
