human health but also an enhanced understanding of the linkages between these factors and health effects to determine at which level to target their actions most effectively In recent years there also has been a shift from trying to change at the national level to more comprehensive and ambitious actions being developed and implemented at the regional and local levels Cities have come to the forefront of providing solutions for environmental issues such as climate change which has co benefits for health but yet need better knowledge for wider health centric action This book provides the latest and most up to date information and studies for academics and practitioners alike *Urban Transport Planning* Harry T.
