Foundation Website Creation with CSS, XHTML, and JavaScript Steve Smith,Jonathan Lane,2008-09-02 Foundation Website Creation with CSS XHTML and JavaScript covers the entire process of building a website This process involves much more than just technical knowledge and this book provides you with all the information you'll need to understand the concepts behind designing and developing for the Web as well as the best means to deliver professional best practice based results There is far more to building a successful website than knowing a little Hypertext Markup Language HTML The process starts long before any coding takes place and this book introduces you to the agile development process explaining why this method makes so much sense for web projects and how best to implement it Planning is vital so you'll also learn how to use techniques such as brainstorming wireframes mockups and prototypes to get your project off to the best possible start and help ensure smooth progress as it develops An understanding of correct semantic markup is essential to any web professional so this book explains how XHTML should be used to structure content so that the markup adheres to current web standards You'll learn about the wide range of HTML elements available to you and you'll learn how and when to use them through building example web pages Without creative use of Cascading Style Sheets CSS websites would all look largely the same CSS gives you the ability to set your website apart from the rest while maintaining the integrity of your markup You'll learn how CSS works and how to apply styles to your pages enabling you to realize your design ideas in the browser JavaScript can be used to make your website easier and more interesting to use This book provides information on appropriate uses of this technology and introduces the concepts of programming using it You'll also see how JavaScript works as part of the much

hyped technique Ajax and in turn where Ajax fits into the wider Web 2.0 picture. While a website is being built it needs to be tested across multiple browsers and platforms to ensure that the site works for all users regardless of ability or disability and the book explains how best to do these tasks. Then it discusses the process of launching and maintaining the site so that it will continue to work for all its users throughout its life cycle. The book concludes by covering server side technologies acting as a guide to the different options available and explaining differences between available products. With insights from renowned experts such as Jason Fried of 37signals, Daniel Burka of Digg and Pownce and Chris Messina of Citizen Agency, this book provides invaluable information applicable to every web project regardless of size, scope or budget.

Web Project Management for Academic Libraries Jody Condit Fagan, Jennifer Keach, 2009-12-04. Managing the process of building and maintaining an effective library website can be as challenging as designing the product itself. Web Project Management for Academic Libraries outlines the best practices for managing successful projects related to the academic library website. The book is a collection of practical, real world solutions to help web project managers plan, engage stakeholders and lead organizations through change. Topics covered include the definition and responsibilities of a web project manager, necessary roles for the project team, effective communication practices, designing project workflow, executing the project and usability testing and quality control. The techniques recommended are drawn from the experiences of the authors and from library and project management literature. The book is an essential text for library staff working as project managers or on web teams, library administrators, library school faculty and students and web consultants working with libraries. Field tested web project management guidance grounded in the literature of librarianship, project management and web development. Consideration of the special needs of academic libraries. Practical step by step guidance for novices and experts in libraries of all sizes.

Foundation Website Creation with HTML5, CSS3, and JavaScript Joe Lewis, Jonathan Lane, Meitar Moscovitz, Tom Barker, 2012-09-05. Foundation Website Creation with HTML5, CSS3 and JavaScript shows the entire process of building a website. This process involves much more than just technical knowledge and this book provides all the information you'll need to understand the concepts behind designing and developing for the Web as well as the best means to deliver professional results based on best practices. Of course there is far more to building a successful website than knowing a little Hypertext Markup Language (HTML). The process starts long before any coding takes place and this book introduces you to the agile development process explaining why this method makes so much sense for web projects and how best to implement it. We also make sure you're up to date by using the latest HTML5 features. Planning is vital so you'll also learn to use techniques such as brainstorming, wireframes, mockups and prototypes to get your project off to the best possible start and help ensure smooth progress as it develops. An understanding of correct semantic markup is essential for any web professional; this book explains how HTML5 should be used to structure content so that the markup adheres to current web standards. You'll learn about the wide range of HTML5 elements available to you and you'll learn how and when to use them through building

example web pages Without creative use of Cascading Style Sheets CSS websites would all look largely the same CSS enables you to set your website apart from the rest while maintaining the integrity of your markup We ll showcase the new features of CSS3 and how you can use them You ll learn how CSS3 works and how to apply styles to your pages allowing you to realize your design ideas in the browser JavaScript can be used to make your website easier and more interesting to use This book provides information on appropriate uses of this technology and introduces the concepts of JavaScript programming You ll also see how JavaScript works as part of the much hyped technique Ajax and in turn where Ajax fits into the wider Web 2 0 picture While a website is being built it needs to be tested across multiple browsers and platforms to ensure that the site works for all users regardless of ability or disability and this book explains how best to accomplish these tasks Then it discusses the process of launching and maintaining the site so that it will continue to work for all its users throughout its life cycle Foundation Website Creation with HTML5 CSS3 and JavaScript concludes by covering server side technologies acting as a guide to the different options available With insights from renowned experts such as Jason Fried of 37signals Daniel Burka of Digg and Pownce and Chris Messina of Citizen Agency Foundation Website Creation with CSS XHTML and JavaScript provides invaluable information applicable to every web project regardless of size scope or budget
